Western Asset Premier Bond Fund

Fund Performance

Total returns for the Fund for various periods ended December 31, 2008 are presented below, along with those of comparative indices:

	Average Annual Total Returns			
	One	Five	Since	
	Year	Years	Inception ^A	
Total Fund Investment Return Based on:				
Net Asset Value	-32.45%	-2.18%	1.49%	
Market Value	-24.60%	-2.68%	1.17%	
Barclays Capital U.S. Corporate High Yield Index ^B	-26.16%	-0.80%	2.75%	
Barclays Capital U.S. Credit Index ^C	-3.08%	2.65%	4.66%	
Lipper Corporate Debt Closed-End Funds BBB Rated Category Average ^D	-13.29%	-0.86%	3.86%	

The performance data quoted represent past performance and do not guarantee future results. Current performance may be lower or higher than the performance data quoted. The investment return and principal value of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than the original cost. Calculations assume reinvestment of dividends and capital gain distributions.

General Market Performance

During 2008, the Federal Reserve Board ("Fed")^E intensified its campaign against downside risks to growth in response to the deepening financial crisis. The TED spread^F surged beyond previous extreme levels, and without the provision of credit, investors began to question the durability of the underlying economy. The federal funds rate^G was reduced a cumulative 425 basis points^H ("bps") over the year (525 bps since September 2007) to near 0% by year end, which essentially moved the Fed beyond its traditional form of stimulus. A number of new lending facilities, designed to meet the liquidity demands of financial intermediaries across the full banking spectrum, were implemented. The Fed and the U.S. Department of the Treasury recently announced plans to channel up to \$600 billion directly to the mortgage market, and up to \$200 billion directly to consumer and small business finance, including credit card, auto and student loans. Details emerged that much of this funding will be unsterilized, that is, will result in a major increase in the money supply. Yields on 30-year fixed-rate conventional mortgages declined roughly 1% as a result, the lowest level during the 37 year history of Freddie Mac. The Treasury allocated the first \$250 billion of funds authorized under the Troubled Asset Relief Program ("TARP") by taking direct equity stakes in the U.S. banking system. Economic data was negative and third quarter gross domestic product ("GDP")^I contracted 0.5% on falling consumption expenditures. Consumer confidence fell as labor market conditions deteriorated and equity prices plunged. Unemployment increased 2.3% to 7.2%, though the U.S. dollar gained close to 6% against a trade-weighted basket of currencies. The dollar's negative correlation with oil held strong as the price per barrel fell 54% after temporarily spiking in the summer. All in all, the reporting period was the worst year for risk-taking in a quarter century. Spreads widened over 350 bps on investment grade issues and more than 1,100 bps on high-yield issues. Mortgage-backed securities ("MBS") performed better, though even these government-backed securities underperformed Treasuries by 2.32% over the period. The S&P 500 Index^J lost 37% as volatility soared, making 2008 the worst year for equities since 1937.

The Investment Commentary is not a part of the Annual Report to Shareholders.

^A The Fund's inception date is March 28, 2002. Index returns are for periods beginning March 31, 2002.

^BThe Barclays Capital (formerly Lehman Brothers) U.S. Corporate High Yield Index covers the universe of fixed-rate, non-investment grade debt, including corporate and non-corporate sectors. Pay-in-kind ("PIK") bonds, Eurobonds and debt issues from countries designated as emerging markets are excluded, but Canadian and global bonds (SEC registered) of issuers in non-emerging market countries are included. Original issue zero coupon bonds, step-up coupon structures and 144-As are also included.

^cThe Barclays Capital (formerly Lehman Brothers) U.S. Credit Index is an index composed of corporate and non-corporate debt issues that are investment grade (rated Baa3/BBB- or higher).

^DLipper, Inc., a wholly-owned subsidiary of Reuters, provides independent insight on global collective investments. The Lipper Corporate Debt Closed-End Funds BBB Rated Category Average is comprised of the Fund's peer group of mutual funds.

^E The Federal Reserve Board ("Fed") is responsible for the formulation of policies designed to promote economic growth, full employment, stable prices and a sustainable pattern of international trade and payments.

^F The TED spread is the price difference between three-month futures contracts for U.S. Treasuries and three-month contracts for Euros having identical expiration months.

^GThe federal funds rate is the rate charged by one depository institution on an overnight sale of immediately available funds (balances at the Federal Reserve) to another depository institution; the rate may vary from depository institution to depository institution and from day to day. ^HA basis point is one one-bundredth (1/100 or 0.01) of one percent.

¹ Gross domestic product ("GDP") is the market value of all final goods and services produced within a country in a given period of time.

¹ The S&P 500 Index is an unmanaged index of 500 stocks and is generally representative of the performance of larger companies in the U.S.

Portfolio Manager Comments

The Barclays Capital U.S. Credit Index (the "Index") returned -3.08% in 2008. The option-adjusted spread ("OAS")^K of the Index widened to +493 bps on December 31, 2008 over similar duration^L U.S. Treasuries from +181 bps on December 31, 2007. The asset class performed 1786 bps less versus similar duration U.S. Treasuries. In order of performance (best to worst), the three major sectors of the corporate market, Industrials, Utilities and Financials, returned -1.98%, -3.68% and -8.37%, respectively, for 2008.

The year began on shaky ground as the risk of further and substantial subprime-related losses continued to traumatize the asset class. During the first quarter, Countrywide Financial, the largest private originator of U.S. home mortgages, had a close brush with death before throwing itself into the arms of Bank of America. The monoline insurance industry, including MBIA and AMBAC, basically went into run-off, as subprime-related losses led to multiple downgrades, eliminating the advantage of a monoline wrap. Bear Stearns suffered a liquidity crisis which resulted in it basically failing, only to have the Fed step in and finance a takeover by JPMorgan Chase. As the quarter neared its end, the cumulative effect of the Fed's actions (including opening the discount window to broker-dealers), the success of financial institutions in raising over \$100 billion of equity capital as well as the apparent resolution in the cases of Countrywide Financial and Bear Stearns, seemed to steady the market.

The asset class began the second quarter on a number of positive notes. There were encouraging signs that the Housing sector decline was slowing. Inflation measures were within the "acceptable" range. Volatility eased, GDP growth remained in the black and risk premiums compressed. Liquidity returned and there was a sense that better days were ahead. However, it wasn't to be. Oil prices, which had been moving up steadily since the beginning of the quarter, reached \$130/bbl on June 19 when Citigroup announced it would take a "significant" write-off attributable to its exposure to subprime-collateralized debt obligations ("CDOs"). The market retched and collapsed.

The third quarter began weak and continued to spiral downhill. In early July, Federal regulators moved to sieze IndyMac Bank, the third largest bank failure on record. Shortly thereafter, Merrill Lynch reported a \$5.7 billion loss related to the sale of distressed CDO assets. The release of quarterly financial results, in which the two largest government-sponsored enterprises ("GSEs"), Fannie Mae and Freddie Mac, posted significantly greater losses than the market anticipated, pushed the market to the edge. The earnings announcements were followed by a number of initiatives by the Treasury and the Fed designed to arrest rapidly escalating systemic fear within the credit market, but to little avail. In September, the lid came off the market as, in rapid succession, Fannie Mae and Freddie Mac were placed into conservatorship by government authorities, Lehman Brothers filed for bankruptcy, Merrill Lynch and Countrywide were acquired by Bank of America, Washington Mutual was seized, with its deposits sold to JPMorgan Chase, AIG was forced to accept a government rescue package that basically wiped out existing equity holders and subordinated current debt holders and Wachovia agreed to be acquired by Citigroup in a transaction assisted by the Federal Deposit Insurance Corporation ("FDIC"). The government's intervention in the case of AIG restored some degree of order, however, even that relief proved to be temporary. Despite a variety of measures implemented by central banks around the globe, credit markets ended the period with no bids for the bonds of issuers from every corner of the market, while levered investors continued to face margin calls. By quarter's end, the credit markets were barely functioning as the government took up action on a rescue plan and market participants prepared for the worst in advance of the settlement process of credit default swaps written on Fannie Mae, Freddie Mac and Lehman Brothers.

The fourth quarter began on a sour note with the failure of Congress to pass legislation to deal with the financial crisis. When global stock markets plummeted in reaction, the U.S. government enacted numerous policy responses in an effort to stabilize and revive economic activity. TARP provided \$700 billion of support for various projects. At first, this program was designed to purchase troubled securities, and eventually evolved into a direct investment program in U.S. financial institutions. The Commercial Paper Funding Facility was implemented to improve liquidity in the commercial paper market by funding a backstop source for commercial paper issuers. The Capital Purchase Program provided \$250 billion of TARP monies for direct capital infusions in commercial banks. Many other programs were initiated and/or clarified, but did little to steady the market. November began on a more optimistic note. The election of Senator Obama as President provided what proved to be a temporary respite from the asset class's plunge to depths not seen since the Great Depression. Following the election, a steady stream of negative economic reports and a slew of lowered earnings forecasts refocused attention on the issues at hand. A \$25.3 billion loss at Freddie Mac and a U.S. government rescue of Citigroup were sobering. Liquidity in all but the safest names was challenged, as dealers continued to retreat

The Investment Commentary is not a part of the Annual Report to Shareholders.

^{*K*} An option-adjusted spread ("OAS") is a measurement tool for evaluating price differences between similar products net of any embedded options. A larger OAS implies a greater return for greater risks.

¹ Duration is the measure of the price sensitivity of a fixed-income security to an interest rate change of 100 basis points. Calculation is based on the weighted average of the present values for all cash flows.

Investment Commentary

from market making and reduced risk. On December 8th, the OAS on the Index hit a record wide spread of +540 bps. For the remainder of the month/year, the market turned its attention towards the government's increasingly aggressive policy responses and staged a strong rally that helped pare losses in what was unquestionably the worst year for credit since the Great Depression.

The best performing sectors of the Index for the reporting period were Consumer Noncyclicals and Non-Corporates, which returned 4.12% and 6.68%, respectively. In Consumer Noncyclicals, Pharmaceuticals was the top industry, returning 9.10%. Above-forecast earnings for *Abbott Laboratories* and *Johnson & Johnson* helped drive returns for the group. The Non-Corporates sector includes U.S. dollar issuance of quasi-agency entities of mostly non-U.S. sovereign issuers and has been historically highly correlated to U.S. Treasuries. The *Asian Development Bank* ("ADB"), a multilateral development finance institution which promotes economic and social progress in Asia, was the sector's top performer, generating a return of 7.78%. The worst performing sectors within the Index included Financials and Basic Industry, which returned -8.37% and -10.07%, respectively. Financial institutions, many of which were discussed earlier, failed or received a government bailout. Basic Industry, a sector whose performance typically tracks economic activity, includes paper companies. *Weyerhaeuser Paper* returned -18.19% in 2008.

It's difficult to forecast when the current state of disequilibrium will end, or when liquidity will return to the marketplace, but policy-makers seem determined to avoid erring on the side of doing too little. While the economy has become less responsive to traditional policy measures, the Fed has successfully provided stimulus through non-traditional measures. Mortgage yields have fallen to the lowest level in the 37 year history of Freddie Mac as the market prepares for up to \$500 billion of direct purchases of fixed-rate agency MBS. The Fed is essentially printing money and channelling it directly to the housing market to help arrest the decline in home prices.

Therefore, we are currently assigning a high probability to policy-makers' success, not in restoring growth, but simply in ending the vicious cycle and restoring some semblance of equilibrium. Once liquidity returns to the marketplace, pricing in the fixed-income market should improve. We would also emphasize, however, that any new equilibrium will not necessarily be rosy. Policy-makers may be empowered to end the vicious cycle of debt-deflation, but they cannot provide a sustainable engine of growth to replace the overspent U.S. consumer. Credit spreads will likely not enjoy as sharp a reversal as they had when past financial crises came to an end. Nevertheless, we believe this may be a profitable opportunity for investors with time on their side. The market has priced in a debt-deflationary vicious cycle for years to come, and anything less catastrophic could be positive for investors with a bias away from risk-free government debt. A well-diversified portfolio should benefit from elevated spread levels that more than compensate for rising defaults, and a gradual reduction of the liquidity discount.

Western Asset Management Company

Investment Risks: Bonds are subject to a variety of risks, including interest rate, credit and inflation risk. As interest rates rise, bond prices fall, reducing the value of a fixed-income investment's price. The Fund may invest in high-yield bonds, which are rated below investment grade and carry more risk than higher-rated securities. To the extent that the Fund invests in asset-backed, mortgage-backed or mortgage-related securities, its exposure to prepayment and extension risks may be greater than investments in other fixed-income securities.

Western Asset

Premier Bond Fund

Annual Report to Shareholders December 31, 2008

Management's Discussion of Fund Performance

Total return on net asset value ("NAV")^A measures investment performance in terms of appreciation or depreciation in NAV per share, plus dividends and any capital gain distributions. Total return on market value measures investment performance in terms of appreciation or depreciation in market price per share, plus dividends and any capital gain distributions. Total returns for the Fund for various periods ended December 31, 2008 are presented below, along with those of comparative indices:

	Average Annual Total Returns			
	One	Five	Since	
	Year	Years	Inception ^B	
Total Fund Investment Return Based on:				
Net Asset Value	-32.45%	-2.18%	1.49%	
Market Value	-24.60%	-2.68%	1.17%	
Barclays Capital U.S. Corporate High Yield Index ^C	-26.16%	-0.80%	2.75%	
Barclays Capital U.S. Credit Index ^D	-3.08%	2.65%	4.66%	
Lipper Corporate Debt Closed-End Funds BBB Rated Category Average ^E	-13.29%	-0.86%	3.86%	

The performance data quoted represent past performance and do not guarantee future results. Current performance may be lower or higher than the performance data quoted. The investment return and principal value of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than the original cost. Calculations assume reinvestment of dividends and capital gain distributions.

For the 12 months ended December 31, 2008, Western Asset Premier Bond Fund returned -32.45% based on its NAV and -24.60% based on its New York Stock Exchange ("NYSE") market price per share. The Lipper Corporate Debt Closed-End Funds BBB Rated Category Average returned -13.29% over the same time frame. Please note that Lipper performance returns are based on each fund's NAV.

During the 12-month period, the Fund made distributions to common shareholders totaling \$1.15 per share. The Fund began the year with its market price per share at a discount to NAV of (7.92)% and ended the year with its market price per share at a premium to NAV of 2.06%.

An allocation to inflation-linked securities contributed to performance for the period. Agency mortgage-backed securities ("MBS") suffered for a majority of the period until the U.S. Department of the Treasury took the government-sponsored enterprises ("GSEs") into conservatorship in September 2008. A major rally was set off in the beginning weeks of September 2008 as spreads began to compress. Overall, for the twelve months ended December 31, 2008, our exposure to agency MBS contributed to performance. The Fund's exposure to non-agency MBS, through a combination of bonds and derivatives, was the primary detractor from performance. The use of credit default swaps, which increased the Fund's exposure to the subprime market, significantly detracted from performance. A series of bankruptcies, government conservatorships and mergers stemming from the credit crisis affected our investment grade positions. In September 2008, the federal government placed Fannie Mae and Freddie Mac, the GSEs, into conservatorship, purchased \$1 billion in senior preferred stock in each GSE, and indefinitely suspended the dividend on the existing preferred shares, thereby subordinating the interests of the existing preferred shareholders to the Treasury's. The

^ANet asset value ("NAV") is calculated by subtracting total liabilities and outstanding preferred stock (if any) from the closing value of all securities beld by the Fund (plus all other assets) and dividing the result (total net assets) by the total number of the common shares outstanding. The NAV fluctuates with changes in the market prices of securities in which the Fund has invested. However, the price at which an investor may buy or sell shares of the Fund is the Fund's market price as determined by supply of and demand for the Fund's shares.

^B The Fund's inception date is March 28, 2002. Index returns are for periods beginning March 31, 2002.

^cThe Barclays Capital (formerly Lehman Brothers) U.S. Corporate High Yield Index covers the universe of fixed-rate, non-investment grade debt, including corporate and non-corporate sectors. Pay-in-kind ("PIK") bonds, Eurobonds and debt issues from countries designated as emerging markets are excluded, but Canadian and global bonds (SEC registered) of issuers in non-emerging market countries are included. Original issue zero coupon bonds, step-up coupon structures and 144-As are also included.

^DThe Barclays Capital (formerly Lehman Brothers) U.S. Credit Index is an index composed of corporate and non-corporate debt issues that are investment grade (rated Baa3/BBB- or higher).

^E Lipper, Inc., a wholly-owned subsidiary of Reuters, provides independent insight on global collective investments. The Lipper Corporate Debt Closed-End Funds BBB Rated Category Average is comprised of the Fund's peer group of mutual funds.

Annual Report to Shareholders

Management's Discussion of Fund Performance—Continued

Fund's exposure to Fannie Mae and Freddie Mac preferreds detracted from performance. The Fund's exposure to the broad highyield market, through a combination of bonds and derivatives, also detracted from performance. Specifically, the Fund's exposure to *Ford* and *General Motors* detracted from performance as spreads widened.

The Fund

Western Asset Premier Bond Fund ("WEA" or the "Fund") is a diversified, closed-end management investment company which seeks to provide current income and capital appreciation for its shareholders by investing primarily in a diversified portfolio of investment grade bonds. Substantially all of the Fund's net investment income (after payment of dividends to holders of preferred shares and interest in connection with other forms of leverage (if applicable)) is distributed to the Fund's common shareholders. A Dividend Reinvestment Plan is available to those common shareholders of record desiring it. The Fund's common shares are listed on the New York Stock Exchange ("NYSE") where they trade under the symbol WEA.

Certain Investment Policies

Each limitation below applies only at the time a transaction is entered into. Any subsequent change in a rating assigned to a security, or change in the percentage of the Fund's assets invested in certain securities or other instruments, resulting from market fluctuations or other changes in the Fund's total assets, will not require the Fund to dispose of an investment.

Under normal market conditions, the Fund expects to:

- Invest substantially all (but at least 80%) of its total managed assets (the total assets of the Fund, including any assets attributable to leverage, less accrued liabilities) in bonds, including corporate bonds, U.S. government and agency securities and mortgage related securities.
- Invest at least 65% of its total managed assets in bonds that at the time of investment are investment grade quality. The Fund may invest up to 35% of its total managed assets in bonds of below investment grade quality.

The Fund is operated by a person who has claimed an exclusion from the definition of the term "commodity pool operator" under the Commodity Exchange Act (the "CEA"), and, therefore, such person is not subject to registration or regulation as a pool operator under the CEA.

The Fund may invest in securities or instruments other than bonds (including preferred stock) and may invest up to 10% of its total managed assets in instruments denominated in currencies other than the U.S. dollar.

Dividend Reinvestment Plan

The Fund and American Stock Transfer and Trust Company LLC ("Agent"), as the Transfer Agent (previously Computershare Trust Company, N.A.) and Registrar of the Fund, offer a convenient way to add shares of the Fund to your account. The Fund offers to all common shareholders a Dividend Reinvestment Plan ("Plan"). Under the Plan, cash distributions (e.g., dividends and capital

Fund Highlights—Continued

gains) of registered shareholders (those who own shares in their own name on the Fund's records) on the common shares are automatically invested in shares of the Fund unless the shareholder elects otherwise by contacting the Agent at the address set forth on the next page. Shareholders who own shares in a brokerage, bank or other financial institution account must contact the company where their account is held in order to participate in the Plan.

As a participant in the Dividend Reinvestment Plan you will automatically receive your dividend or net capital gains distribution in newly issued shares of the Fund if the market price of a share on the date of the distribution is at or above the NAV of a Fund share, minus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market. The number of shares to be issued to you will be determined by dividing the amount of the cash distribution to which you are entitled (net of any applicable withholding taxes) by the greater of the NAV per share on such date or 95% of the market price of a share on such date. If the market price of a share on such distribution date is below the NAV, minus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market, the Agent will, as agent for the participants, buy shares of the Fund through a broker on the open market. The price per share of shares purchased for each participant's account with respect to a particular dividend or other distribution will be the average price (including brokerage commissions, transfer taxes and any other costs of purchase) of all shares purchased with respect to that dividend or other distribution. All common shares acquired on your behalf through the Plan will be automatically credited to an account maintained on the books of the Agent. Full and fractional shares will be voted by the Agent in accordance with your instructions.

Additional Information Regarding the Plan

The Fund will pay all costs applicable to the Plan, except for brokerage commissions for open market purchases by the Agent under the Plan, which will be charged to participants. All shares acquired through the Plan receive voting rights and are eligible for any stock split, stock dividend, or other rights accruing to shareholders that the Board of Trustees may declare.

You may terminate participation in the Plan at any time by giving written notice to the Agent. Such termination will be effective prior to the record date next succeeding the receipt of such instructions or by a later date of termination specified in such instructions. Upon termination, a participant will receive a certificate for the full shares credited to his or her account or may request the sale of all or part of such shares. Fractional shares credited to a terminating account will be paid for in cash at the current market price at the time of termination.

Dividends and other distributions invested in additional shares under the Plan are subject to income tax just as if they had been received in cash. After year end, dividends paid on the accumulated shares will be included in the Form 1099-DIV information return to the Internal Revenue Service (IRS) and only one Form 1099-DIV will be sent to participants each year.

Inquiries regarding the Plan, as well as notices of termination, should be directed to American Stock Transfer and Trust Company LLC, P.O. Box 922, Wall Street Station, New York N.Y. 10269-0560—Investor Relations Telephone number 1-888-888-0151.

Schedule of Portfolio Holdings

The Fund files a complete schedule of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q as well as in its semi-annual report to shareholders. You may obtain a free copy of the Fund's Form N-Q by writing to the Fund, or you may obtain a copy of this report (and other information relating to the Fund) from the Securities and Exchange Commission's ("SEC") website (http://www.sec.gov). Additionally, the Fund's Form N-Q can be viewed or copied at the SEC's Public Reference Room in Washington D.C. Information about the operation of the Public Reference Room can be obtained by calling 1-202-551-8090.

Annual Certifications

In May 2008, the Fund submitted its annual CEO certification to the NYSE in which the Fund's principal executive officer certified that he was not aware, as of the date of the certification, of any violation by the Fund of the NYSE's Corporate Governance listing standards. In addition, as required by Section 302 of the Sarbanes-Oxley Act of 2002 and related SEC rules, the Fund's principal executive and principal financial officers have made quarterly certifications, included in filings with the SEC on Forms N-CSR and N-Q, relating to, among other things, the Fund's disclosure controls and procedures and internal control over financial reporting.

Proxy Voting

You may request a free description of the policies and procedures that the Fund uses to determine how proxies relating to the Fund's portfolio securities are voted by writing to the Fund, or you may obtain a copy of these policies and procedures (and other information relating to the Fund) from the SEC's web site (http://www.sec.gov). You may request a free report regarding how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 by writing to the Fund, or you may obtain a copy of this report (and other information relating to the Fund), from the SEC's website (http://www.sec.gov).

Quarterly Comparison of Market Price and Net Asset Value ("NAV"), Discount or Premium to NAV and Average Daily Volume of Shares Traded

	Market Price	Net Asset Value	Premium/ (Discount)	Average Daily Volume/(Shares)
March 31, 2008	\$12.43	\$12.99	(4.31)%	20,549
June 30, 2008	\$12.24	\$12.68	(3.47)%	18,877
September 30, 2008	\$ 9.20	\$10.83	(15.05)%	24,108
December 31, 2008	\$ 8.90	\$ 8.72	2.06%	43,032

Notice to Shareholders

On May 22, 2008, the Fund announced plans that, had they been consummated, would have allowed the Fund to restructure its leverage and provide liquidity to holders of its \$72 million in auction rate preferred shares ("ARPS") on terms and conditions management and the Board of the Fund believed were in the best interests of the Fund.

Pursuant to that planned restructuring, the Fund intended to redeem all of its currently outstanding \$72 million in ARPS using a combination of borrowings under a new \$68 million, 364-day credit facility to be entered into with a major domestic bank, reverse repurchase agreements, cash currently in the Fund's portfolio, and/or the proceeds of sales of portfolio securities. Any use of cash in the Fund's portfolio or use of proceeds from the sale of portfolio securities could have resulted in a moderate decrease in the Fund's leverage. The ARPS would have been redeemed at the required liquidation preference of \$25,000 per share plus accrued and unpaid dividends thereon.

On September 29, 2008, the Fund announced that unprecedented turbulent conditions in the fixed-income market, and financial markets in general, had led it to re-evaluate the timing of the refinancing of the Fund's ARPS. The Fund's investment adviser continues to monitor the financial markets and the Fund currently intends to move forward with the refinancing of the ARPS when and if the Board of the Fund believes that it would be in the best interests of the Fund and financing on acceptable terms is available.

* * * * * * *

Effective February 3, 2009, Western Asset Management Company Pte. Ltd. in Singapore ("Western Singapore") and Western Asset Management Company Ltd in Japan ("Western Japan") have been added as subadvisers to the Fund under portfolio management agreements between Western Asset Management Company ("Western Asset") and Western Singapore, and Western Asset and Western Japan. Western Asset, Western Singapore and Western Japan are wholly-owned subsidiaries of Legg Mason, Inc.

Fund Highlights—Continued

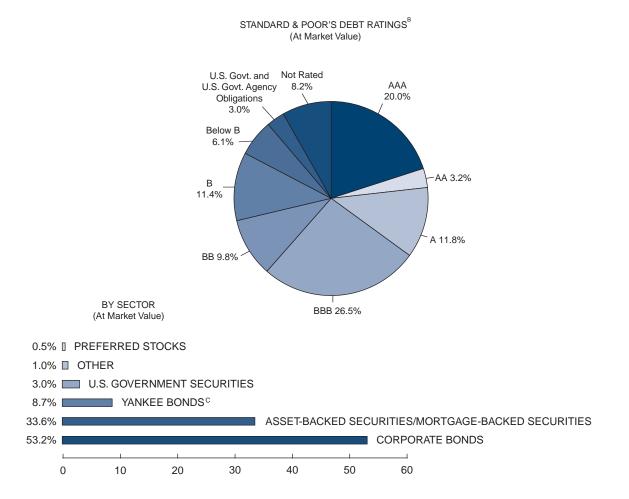

Western Singapore was established in 2000 and has offices at 1 George Street #23-01, Singapore 049145. Western Japan was founded in 1991 and has offices at 36F Shin-Marunouchi Building, 5-1 Marunouchi 1-Chome Chiyoda-Ku, Tokyo 100-6536, Japan.

Western Singapore and Western Japan are generally responsible for managing Asian (excluding Japan) and Japanese fixedincome mandates, respectively, including the related portions of Western Asset's broader portfolios, as well as servicing relationships in those regions. They undertake all investment-related activities, including investment management, research and analysis, securities settlement, and client services.

Western Singapore and Western Japan will provide certain subadvisory services to the Fund relating to currency transactions and investments in non-U.S. dollar-denominated securities and related foreign currency instruments in Asia (excluding Japan) and Japan, respectively. The Fund's current management fee remains unchanged. Western Asset Management Company Limited will continue to provide subadvisory services with respect to other aspects of the non-U.S. dollar-denominated portions of the Fund's investment portfolio.

Portfolio Diversification

December 31, 2008^{*A*}

The pie and bar charts above represent the composition of the Fund's portfolio as of December 31, 2008 and do not include derivatives such as Futures Contracts, Options Written, and Credit Default Swaps.

^AThe Fund is actively managed. As a result, the composition of its portfolio holdings and sectors is subject to change at any time. ^BStandard & Poor's Ratings Services provides capital markets with credit ratings for the evaluation and assessment of credit risk. ^CYankee Bond – A dollar-denominated bond issued in the U.S. by foreign entities.

N.M.—Not Meaningful.

^ARule 144a Security – A security purchased pursuant to Rule 144a under the Securities Act of 1933 which may not be resold subject to that rule except to qualified institutional buyers. These securities, which the Fund's investment adviser has determined to be liquid, represent 31.51% of net assets.

^BPay-in-Kind ("PIK") security – A security in which interest or dividends during the initial few years is paid in additional PIK securities rather than in cash.

^CIndexed Security – The rates of interest earned on these securities are tied to the London Interbank Offered Rate ("LIBOR"), the Euro Interbank Offered Rate ("EURIBOR") Index, the Consumer Price Index ("CPI"), the one-year Treasury Bill Rate or the ten-year Japanese Government Bond Rate. The coupon rates are the rates as of December 31, 2008.

^DStepped Coupon Security – A security with a predetermined schedule of interest or dividend rate changes at which time it begins to accrue interest or pay dividends according to the predetermined schedule.

^E Convertible Security – Security may be converted into the issuer's common stock.

^FBond is currently in default.

^GCredit Linked Security – The rates of interest earned on these securities are tied to the credit rating assigned by Standard & Poor's Rating Service and/or Moody's Investors Services.

HIlliquid security valued at fair value under the procedures approved by the Board of Trustees.

¹ Yankee Bond – A dollar-denominated bond issued in the U.S. by foreign entities.

¹ Stripped Security – Security with interest-only or principal-only payment streams, denoted by a 1 or 2, respectively. For interest-only securities, the amount shown as principal is the notional balance used to calculate the amount of interest due.

^{*K*} The coupon rates shown on variable rate securities are the rates at December 31, 2008. These rates vary with the weighted average coupon of the underlying loans.

¹ On September 7, 2008, the Federal Housing Finance Agency placed Fannie Mae and Freddie Mac into Conservatorship.

^MNon-income producing.

^NRestricted Security – Security is valued at fair value as determined in good faith by, or under the direction of, the Board of Trustees under procedures established by the Board of Trustees.

^oAt December 31, 2008, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 5,126,536
Gross unrealized depreciation	(58,271,594)
Net unrealized depreciation	\$(53,145,058)

Asset coverage on preferred shares, end of year ^D	239%	327%	341%	337%	346%
Liquidation and market value per share (in thousands)	\$ 25	\$ 25	\$ 25	\$ 25	\$ 25

^AComputed using average daily shares outstanding.

^BTotal expenses reflects operating expenses prior to any voluntary expense waivers and/or compensating balance credits. Expenses net of waivers reflects total expenses before compensating balance credits but net of any voluntary expense waivers. Expenses net of all reductions reflects expenses less any compensating balance credits and/or voluntary expense waivers.

^CRatios are calculated on the basis of income and expenses applicable to both the common and preferred shares relative to the average net assets of common shareholders. Ratios of net investment income before preferred share dividends to average net assets of common shareholders are 12.33%, 9.21%, 8.99%, 8.85% and 9.11%, respectively.

^DAsset coverage on preferred shares equals net assets of common shares plus the redemption value of the preferred shares divided by the value of outstanding preferred stock.

Notes to Financial Statements

1. Significant Accounting Policies:

Western Asset Premier Bond Fund (the "Fund") is registered under the Investment Company Act of 1940, as amended (the "1940 Act"), as a diversified, closed-end management investment company. The Fund commenced investment operations on March 28, 2002.

The Fund's investment objective is to provide current income and capital appreciation by investing primarily in a diversified portfolio of investment grade bonds. The Fund currently seeks to achieve its investment objective by investing substantially all of its assets in bonds, including corporate bonds, U.S. government and agency securities and mortgage-related securities. The ability of the issuers of the securities held by the Fund to meet their obligations might be affected by, among other things, economic developments in a specific state, industry or region.

Preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements:

Investment Valuation

The Fund's securities are valued under policies approved by and under the general oversight of the Board of Trustees. Effective January 1, 2008, the Fund adopted Statement of Financial Accounting Standards No. 157 ("FAS 157"). FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund's investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1-quoted prices in active markets for identical investments
- Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Debt securities are valued at the last quoted bid prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Equity securities for which market quotations are available are valued at the last sale price or official closing price on the primary market or exchange on which they trade. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market and are valued at the bid price as of the close of business of that market. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these securities at fair value as determined in accordance with the procedures approved by the Fund's Board of Trustees.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following is a summary of the inputs used in valuing the Fund's assets carried at fair value:

	December 31, 2008	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments in Securities	\$163,969,020	\$2,366,552	\$161,141,382	\$461,086
Other Financial Instruments:*				
Derivatives	(9,672,099)		(9,672,099)	
Total Value	\$154,296,921	\$2,366,552	\$151,469,283	\$461,086

* Other financial instruments include derivatives, e.g. swaps contracts.

Following is a reconciliation of investments in which significant unobservable inputs (Level 3) were used in determining fair value:

		nents in urities
Balance as of December 31, 2007	\$	_
Accrued Premiums/Discounts		
Realized Gain (Loss)		
Change in unrealized appreciation (depreciation)		
Net purchases (sales)		
Transfers in and/or out of Level 3	461	1,086
Balance as of December 31, 2008	\$461	1,086

Security Transactions

Security transactions are accounted for as of the trade date. Realized gains and losses from security transactions are reported on an identified cost basis for both financial reporting and federal income tax purposes.

For the year ended December 31, 2008, security transactions (excluding short-term investments) were as follows:

Purchases Proceeds		Proceeds from	Sales
U.S. Gov't. Securities	Other	U.S. Gov't. Securities	Other
\$34,710,194	\$61,383,111	\$58,927,457	\$57,066,135

Foreign Currency Translation

Assets and liabilities initially expressed in non-U.S. currencies are translated into U.S. dollars using currency exchange rates determined prior to the close of trading on the New York Stock Exchange, usually at 2:00 p.m. Eastern time. Purchases and sales of securities and income and expenses are translated into U.S. dollars at the prevailing market rates on the dates of such transactions. The effects of changes in non-U.S. currency exchange rates on investment securities and other assets and liabilities are included with the net realized and unrealized gain or loss on investment securities.

Repurchase Agreements

The Fund may enter into repurchase agreements with institutions that its investment adviser has determined are creditworthy. Each repurchase agreement is recorded at cost. Under the terms of a typical repurchase agreement, a fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and of the fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during a fund's holding period. When entering into repurchase agreements, it is the Fund's policy that its custodian acting on the fund's behalf, or a third party custodian take possession of the underlying collateral securities, the market value of which, at all times, at least equals the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the value of the right to use the collateral to satisfy the terms of the repurchase transaction. However, if the market value of the collateral declines during the period in which the Fund seeks to assert its rights or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Fund may be delayed or limited.

Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements. Under the terms of a typical reverse repurchase agreement, a fund sells a security subject to an obligation to repurchase the security from the buyer at an agreed-upon time and price, thereby determining the yield to the buyer during the buyer's holding period. A reverse repurchase agreement involves the risk, among others, that the market value of the collateral retained by the fund may decline below the price of the securities the fund has sold but is obligated to repurchase under the agreement. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the fund's use of the proceeds of the agreement may be restricted pending a determination by the

party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. In entering into reverse repurchase agreements, the Fund will maintain cash, U.S. government securities or other liquid debt obligations at least equal in value to its obligations with respect to reverse repurchase agreements or will take other actions permitted by law to cover its obligations.

Options, Futures and Swap Agreements

The current market value of an exchange traded option is the last sale price or, in the absence of a sale, the mean between the closing bid and asked price. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Futures contracts are marked-to-market on a daily basis. As the contract's value fluctuates, payments known as variation margin are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses, and the Fund recognizes a gain or loss when the contract is closed. Swap agreements are generally priced daily based upon valuations furnished by an independent pricing service and the change, if any, is recorded as unrealized appreciation or depreciation.

Forward Currency Exchange Contracts

As part of its investment program, the Fund may utilize forward currency exchange contracts. Forward foreign exchange contracts are marked-to-market daily using foreign currency exchange rates supplied by an independent pricing service. The change in the contract's market value is recorded by the Fund as an unrealized gain or loss. When a contract is closed or delivery is taken, the Fund records a realized gain or loss equal to the difference between the value of the contact at the time it was opened and the value at the time it was closed.

The use of forward foreign currency exchange contracts does not eliminate fluctuations in the underlying prices of the Fund's securities, but it does establish a rate of exchange that can be achieved in the future. These forward foreign currency exchange contracts involve market risk in excess of amounts reflected in the financial statements. Although forward foreign currency exchange contracts used for hedging purposes limit the risk of loss due to the decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts.

The Fund had no outstanding forward foreign currency exchange contracts as of December 31, 2008.

Short Sales

The Fund may sell a security it does not own in anticipation of a decline in the market price of that security. The Fund must then borrow the security sold short and deliver it to the dealer that brokered the short sale. A gain, limited to the price at which the security was sold short, or a loss, potentially unlimited in size, will be recognized upon the termination of the short sale. With respect to each short sale, the Fund must maintain collateral in a segregated account consisting of liquid assets with a value at least equal to the current market value of the shorted securities, marked-to-market daily, or take other actions permitted by law to cover its obligations. Dividend expenses and fees paid to brokers to borrow securities in connection with short sales are considered part of the cost of short sale transactions. Dividends declared on securities sold short are recorded as an expense on the ex-dividend date.

The Fund had no open short sales as of December 31, 2008.

Distributions to Common Shareholders

Investment income and distributions to shareholders are recorded on the ex-dividend date. Dividends from net investment income are declared and paid monthly. Net capital gain distributions are declared and paid after the end of the tax year in which the gain is realized. An additional distribution may be made in December to the extent necessary in order to comply with federal excise tax requirements. Distributions are determined in accordance with federal income tax regulations, which may differ from those determined in accordance with accounting principles generally accepted in the United States of America; accordingly, periodic reclassifications are made within the Fund's capital accounts to reflect income and gains available for distribution under federal income tax regulations. Interest income and expenses are recorded on the accrual basis. Bond discounts and premiums are amortized and included in interest income for financial reporting and federal income tax purposes.

Compensating Balance Credits

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments.

Use of Estimates

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

Credit and Market Risk

Investments in structured securities collateralized by residential real estate mortgages are subject to certain credit and liquidity risks. When market conditions result in an increase in default rates of the underlying mortgages and the foreclosure values of underlying real estate properties are materially below the outstanding amount of these underlying mortgages, collection of accrued interest and principal on these investments may be doubtful. Such market conditions may significantly impair the value of these investments resulting in a lack of correlation between their credit ratings and values.

Other

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is dependent upon claims that may be made against the Fund in the future and, therefore, cannot be estimated; however, based on experience, the risk of material loss from such claims is considered remote.

Single Sourced Securities

Certain securities held by the Fund at December 31, 2008 are valued based on a price provided by a single source or dealer. The prices provided may differ from the value that would be realized if the securities were sold. As of December 31, 2008, 12.4% of the securities held by the Fund were either fair valued securities or were valued based on a price provided by a single independent pricing service or dealer ("single source securities").

2. Federal Income Taxes:

It is the Fund's policy to continue to comply with the federal income and excise tax requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, the Fund intends to distribute substantially all of its income and net realized gains on investments, if any, to shareholders each year. Therefore, no federal income tax provision is required in the Fund's financial statements. However, due to the timing of when distributions are made, the Fund may be subject to an excise tax of 4% of the amount by which 98% of the Fund's annual taxable income exceeds the distributions from such taxable income for the year. The Fund has accrued \$167,000 of Federal excise tax attributable to the taxable year ended December 31, 2008.

Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years and has concluded that as of December 31, 2008, no provision for income tax would be required in the Fund's financial statements. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

Reclassifications:

Generally Accepted Accounting Principles ("GAAP") require that certain components of net assets be adjusted to reflect permanent differences between financial and tax reporting. These reclassifications have no effect on net assets or net asset values per share. During the current year, the following reclassifications have been made:

	Undistributed Net Investment Income	Accumulated Net Realized Loss	Paid-in Capital
(a)	\$ 167,000	\$	\$(167,000)
(b)	2,215,250	(2,215,250)	_

(a) Reclassifications are primarily due to a non-deductible excise tax accrued by the Fund.

(b) Reclassifications are primarily due to foreign currency transactions treated as ordinary income for tax purposes, losses from mortgage-backed securities treated as capital losses for tax purposes, book/tax differences in the treatment of swaps and book/tax differences in the treatment of various items.

Distributions to Shareholders:

The tax character of distributions paid during the fiscal years ended December 31, was as follows:

	2008	2007
Distributions paid to Common Shareholders from:		
Ordinary Income	\$12,908,788	\$11,826,083
Net Long-term Capital Gains	303,176	2,214,436
Total Paid to Common Shareholders	\$13,211,964	\$14,040,519
Distributions paid to Preferred Shareholders from :		
Ordinary Income	\$ 2,311,153	\$ 2,907,616
Net Long-term Capital Gains	163,878	996,151
Total Paid to Preferred Shareholders	\$ 2,475,031	\$ 3,903,767
Total Distributions Paid	\$15,686,995	\$17,944,286

As of December 31, 2008, the components of accumulated earnings on a tax basis were as follows:

Undistributed ordinary income-net	\$ 5,852,713
Capital loss carryforward (*)	(3,000,112)
Other book/tax temporary differences ^(a)	(2,255,313)
Unrealized appreciation/(depreciation) ^(b)	(62,880,525)
Total accumulated earnings/(losses)-net	\$(62,283,237)

(*) As of December 31, 2008, the Fund had the following net capital loss carryforward remaining:

Year of Expiration	Amount
12/31/2016	\$(3,000,112)

This amount will be available to offset any future taxable capital gains.

(a) Other book/tax temporary differences are attributable primarily to the deferral of post-October capital losses for tax purposes, book/tax differences in the accrual of interest income on defaulted securities and book/tax differences in the timing of the deductibility of various expenses.

(b) The difference between book-basis and tax-basis unrealized appreciation / (depreciation) is attributable primarily to the tax deferral of losses on wash sales and book/tax differences in the accrual of income on certain securities.

Tax Cost of Investments:

As of December 31, 2008, the aggregate cost of investments for federal tax purposes was \$217,114,078.

3. Financial Instruments:

Option Transactions

As part of its investment program, the Fund may utilize options. Options may be written (sold) or purchased by the Fund. When the Fund purchases a put or call option, the premium paid is recorded as an investment and its value is marked-to-market daily. When the Fund writes a put or call option, an amount equal to the premium received by the Fund is recorded as a liability and its value is marked-to-market daily.

When options, whether written or purchased, expire, are exercised or are closed (by entering into a closing purchase or sale transaction), the Fund realizes a gain or loss as described in the chart below:

Purchased option:	Impact on the Fund:
The option expires	Realize a loss in the amount of the cost of the option.
The option is closed through a closing sale transaction	Realize a gain or loss depending on whether the proceeds from the closing sale transaction are greater or less than the cost of the option.
The Fund exercises a call option	The cost of the security purchased through the exercise of the option will be increased by the premium originally paid to purchase the option.
The Fund exercises a put option	Realize a gain or loss from the sale of the underlying security. The proceeds of that sale will be reduced by the premium originally paid to purchase the put option.
Written option:	Impact on the Fund:
The option expires	Realize a gain equal to the amount of the premium received.
The option is closed through a closing purchase transaction	Realize a gain or loss without regard to any unrealized gain or loss on the underlying security and eliminate the option liability. The Fund will realize a loss in this transaction if the cost of the closing purchase exceeds the premium received when the option was written.
A written call option is exercised by the option purchaser	Realize a gain or loss from the sale of the underlying security. The proceeds of that sale will be increased by the premium originally received when the option was written.
A written put option is exercised by the option purchaser	The amount of the premium originally received will reduce the cost of the security that the Fund purchased when the option was exercised.

The risk associated with purchasing options is limited to the premium originally paid. Options written by the Fund involve, to varying degrees, risk of loss in excess of the option value reflected in the statement of assets and liabilities. The risk in writing a covered call option is that the Fund may forgo the opportunity of profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may not be able to enter into a closing transaction because of an illiquid secondary market or, for over-the-counter options, because of the counterparty's inability to perform.

There was no activity in written options during the year ended December 31, 2008.

Futures

Upon entering into a futures contract, the Fund is required to deposit with the broker cash or cash equivalents in an amount equal to a certain percentage of the contract amount. This is known as the "initial margin." Subsequent payments ("variation margin") are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. For non-U.S. and foreign denominated futures held, payment is not sent daily, but is recorded as a net payable or receivable by the Fund to or from the futures broker, which holds cash collateral from the Fund. The daily changes in contract value are recorded as unrealized gains or losses and the Fund recognizes a realized gain or loss when the contract is closed. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded.

The Fund may enter into futures contracts as a hedge against anticipated changes in interest rates. There are several risks in connection with the use of futures contracts as a hedging device. Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. The change in the value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in the value of the hedged instruments. In addition, there is the risk that a Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

The Fund had no outstanding future positions as of December 31, 2008.

Reverse Repurchase Agreements

For the year ended December 31, 2008, the average amount of reverse repurchase agreement outstanding was \$10,985,397 and the daily weighted average interest rate was 2.94%.

The Fund had no outstanding reverse repurchase agreements as of December 31, 2008.

Swap Agreements

The Fund may invest in swaps for the purpose of managing its exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with ordinary portfolio transactions.

The Fund may enter into credit default swap ("CDS") contracts for investment purposes, to manage its credit risk or to add leverage. CDS agreements involve one party making a stream of payments to another party in exchange for the right to receive a specified return in the event of a default by a third party, typically corporate issuers or sovereign issuers of an emerging country, on a specified obligation or in the event of a write-down, principal shortfall, interest shortfall or default of all or part of the referenced entities comprising a credit index. The Fund may use a CDS to provide a measure of protection against defaults of the issuers (i.e., to reduce risk where a Fund has exposure to the sovereign issuer) or to take an active long or short position with respect to the likelihood of a particular issuer's default. As a seller of protection, the Fund generally receives an upfront payment or a stream of payments throughout the term of the swap provided that there is no credit event. If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the maximum potential amount of future payments (undiscounted) that the Fund could be required to make under a credit default swap agreement would be an amount equal to the notional amount of the agreement. These amounts of potential payments will be partially offset by any recovery of value from the respective referenced obligations. As a seller of protection, the Fund effectively adds leverage to its portfolio because, in addition to its total net assets, the Fund is subject to investment exposure on the notional amount of the swap if a credit event occurs.

Implied spreads are the theoretical price a lender receives for credit default protection. When spreads rise, market perceived credit risk rises and when spreads fall, market perceived credit risk falls. The implied credit spread of a particular referenced entity reflects the cost of buying/selling protection and may include upfront payments required to enter into the agreement. Wider credit spreads and decreasing market values, when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement. Credit spreads utilized in determining the period end market value of credit default swap agreements on corporate issues or sovereign issues of an emerging country are disclosed in the Notes to Financial Statements, serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default for credit derivatives. For credit default swap agreements on asset-backed securities and credit indices, the quoted market prices and resulting values, particularly in relation to the notional amount of the contract, as well as the annual payment rate serve as an indication of the current status of the payment/performance risk.

Payments received or made at the beginning of the measurement period are reflected as a premium or deposit, respectively, on the Statement of Assets and Liabilities. These upfront payments are amortized over the life of the swap and are recognized as realized gain or loss on the Statement of Operations. A liquidation payment received or made at the termination of the swap is recognized as realized gain or loss on the Statement of Operations. Net periodic payments received or paid by the Fund are recognized as realized gain or loss at the time of receipt or payment on the Statement of Operations.

Entering into a CDS agreement involves, to varying degrees, elements of credit, market and documentation risk in excess of the related amounts recognized on the Statement of Assets and Liabilities. Such risks involve the possibility that there will be no liquid market for these agreements, that the counterparty to the agreement may default on its obligation to perform or disagree as to the meaning of the contractual terms in the agreement, and that there will be unfavorable changes in net interest rates.

Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation/(depreciation). Gains or losses are realized upon termination of the swap agreement. Periodic payments and premiums received or made by the Fund are recorded in the accompanying Statement of Operations as realized gains or losses, respectively. Collateral, in the form of restricted cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with the terms of the swap contracts. Risks may exceed amounts recognized on the Statement of Assets and Liabilities. These risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms, and the possible lack of liquidity with respect to the swap agreements.

If the Fund is a seller of protection and a credit event occurs, as defined under the terms of the particular swap agreement, the Fund will pay to the buyer of the protection an amount up to the notional value of the swap and in certain instances, take delivery of the security.

As of December 31, 2008, the one-month London Interbank Offered Rates ("LIBOR") was 0.44%.

The following is a summary of open credit default swap contracts outstanding as of December 31, 2008.

CREDIT DEFAULT SWAPS ON CREDIT INDICES—SELL PROTECTION(1)

- (4) If the Fund is a buyer of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) receive from the seller of protection an amount equal to the notional amount of the swap and deliver the underlying securities comprising the referenced index or (ii) receive a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the underlying securities comprising the referenced index.
- *†* Percentage shown is an annual percentage rate.

4. Common Shares:

Of the 11,474,540 shares of common stock outstanding at December 31, 2008, Western Asset owns 11,975 shares.

5. Preferred Shares:

There are 2,880 shares of Auction Market Preferred Shares ("Preferred Shares") authorized. The Preferred Shares have rights as set forth in the Fund's Agreement and Declaration of Trust, as amended to date, and its Bylaws, as amended to date (the "Bylaws"), or as otherwise determined by the Trustees. The 2,880 Preferred Shares outstanding consist of two series, 1,440 shares of Series M and 1,440 shares of Series W. The Preferred Shares have a liquidation value of \$25,000 per share, plus any accumulated but unpaid dividends whether or not earned or declared.

Dividends on the Series M and Series W Preferred Shares are cumulative and are paid at a rate typically reset every seven and twenty-eight days, respectively, based on the results of an auction. Dividend rates ranged from 0.15% to 5.60% between January 1, 2008 to December 31, 2008. Under the Investment Company Act of 1940, the Fund may not declare dividends or make other distributions on common shares or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding Preferred Shares would be less than 200%.

The Preferred Shares are redeemable at the option of the Fund, in whole or in part, on the second business day preceding any dividend payment date at \$25,000 per share plus any accumulated but unpaid dividends. The Preferred Shares are also subject to mandatory redemption at \$25,000 per share plus any accumulated but unpaid dividends, whether or not earned or declared, if certain requirements relating to the composition of the assets and liabilities of the Fund as set forth in the Bylaws are not satisfied.

Preferred shareholders, who are entitled to one vote per Preferred Share, generally vote as a single class with the common shareholders, but will vote separately as a class (and, in certain circumstances, vote separately by series) with respect to certain matters set forth in the Bylaws. The preferred shareholders are entitled to elect two Trustees of the Fund.

6. Transactions with Affiliates:

The Fund has a management agreement with Western Asset Management Company ("Western Asset"). Pursuant to the terms of the management agreement, the Fund pays Western Asset an annual fee, payable monthly, in an amount equal to 0.55% of the average weekly value of the Fund's total managed assets. "Total managed assets" means the total assets of the Fund (including any assets attributable to leverage) minus accrued liabilities. The liquidation preference of any Preferred Shares outstanding is not considered a liability. Pursuant to a Portfolio Management Agreement between Western Asset and Western Asset Management Company Limited ("WAML"), Western Asset pays a portion of the fees it receives from the Fund to WAML at an annual rate of 0.425% of the average weekly value of the Fund's total managed assets that WAML manages. Western Asset and WAML are wholly owned subsidiaries of Legg Mason, Inc.

⁽¹⁾ If the Fund is a seller of protection and a credit event occurs, as defined under the terms of that particular swap agreement, the Fund will either (i) pay to the buyer of protection an amount equal to the notional amount of the swap and take delivery of the referenced obligation or underlying securities comprising the referenced index or (ii) pay a net settlement amount in the form of cash or securities equal to the notional amount of the swap less the recovery value of the referenced obligation or underlying securities comprising the referenced index.

⁽²⁾ The maximum potential amount the Fund could be required to make as a seller of credit protection or receive as a buyer of credit protection if a credit event occurs as defined under the terms of that particular swap agreement.

⁽³⁾ The quoted market prices and resulting values for credit default swap agreements on asset-backed securities and credit indices serve as an indicator of the current status of the payment/performance risk and represent the likelihood of an expected liability (or profit) for the credit derivative should the notional amount of the swap agreement have been closed/sold as of the period end. Decreasing market values when compared to the notional amount of the swap, represent a deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the agreement.

Under the terms of the Administration Agreement among the Fund, Western Asset and Legg Mason Fund Adviser, Inc. ("LMFA"), Western Asset pays LMFA, a monthly fee at an annual rate of 0.125% of the Fund's average weekly total managed assets, subject to a monthly minimum fee of \$12,500.

7. Trustee Compensation:

Each Independent Trustee receives an aggregate fee of \$70,000 annually for serving on the combined Board of Trustees/ Directors of the Fund, Western Asset Income Fund and Western Asset Funds, Inc. Each Trustee also receives a fee of \$7,500 and related expenses for each meeting of the Board or of a committee attended in-person and a fee of \$2,500 for participating in each telephonic meeting. The Chairman of the Board and the Chairman of the Audit Committee each receive an additional \$25,000 per year for serving in such capacities. Each member of the Audit Committee receives a fee of \$6,000 for serving as a member of the Audit Committee. Other committee members receive a fee of \$3,000 for serving as a member of each committee upon which they serve. All such fees are allocated among the Fund, Western Asset Income Fund and Western Asset Funds, Inc. according to each such investment company's annual net assets. Trustee Ronald Olson receives from Western Asset an aggregate fee of \$70,000 annually for serving on the combined Board of Trustees/Directors of the Fund, Western Asset Income Fund and Western Asset Funds, Inc., as well as a fee of \$7,500 and related expenses for each meeting of the Board attended in person and a fee of \$2,500 for participating in each telephonic meeting.

8. Recent Accounting Pronouncements:

In March 2008, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards No. 161, "*Disclosures about Derivative Instruments and Hedging Activities*" ("FAS 161"). FAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. FAS 161 requires enhanced disclosures about a fund's derivative and hedging activities, including how such activities are accounted for and their effect on a fund's financial position, performance and cash flows. Management is currently evaluating the impact the adoption of FAS 161 will have on the Fund's financial statements and related disclosures.

Annual Report to Shareholders

Report of Independent Registered Public Accounting Firm

To the Board of Trustees and Shareholders of Western Asset Premier Bond Fund:

In our opinion, the accompanying statement of assets and liabilities, including the portfolio of investments, and the related statements of operations and of changes in net assets and the financial highlights present fairly, in all material respects, the financial position of Western Asset Premier Bond Fund (the "Fund") at December 31, 2008, the results of its operations, the changes in its net assets, and the financial highlights for each of the periods presented, in conformity with accounting principles generally accepted in the United States of America. These financial statements and financial highlights (hereafter referred to as "financial statements") are the responsibility of the Fund's management; our responsibility is to express an opinion on these financial statements based on our audits. We conducted our audits of these financial statements in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statement presentation. We believe that our audits, which included confirmation of securities at December 31, 2008 by correspondence with the custodian and brokers, provide a reasonable basis for our opinion.

PricewaterhouseCoppers LLP

Baltimore, Maryland February 27, 2009

Important Tax Information (Unaudited)

The following information is provided with respect to the distributions paid to Common Shareholders during the taxable year ended December 31, 2008:

	January 2008	February 2008 - December 2008
Ordinary Income:		
Qualified Dividend Income for Individuals	1.60%	2.01%
Dividends Qualifying for the Dividends Received		
Deduction for Corporations	1.60%	2.01%
Interest from Federal Obligations	0.80%	0.80%

The following information is provided with respect to the distributions paid to Preferred Shareholders during the taxable year ended December 31, 2008:

	January 2008	February 2008 - December 2008
Ordinary Income:		
Qualified Dividend Income for Individuals	—	2.01%
Dividends Qualifying for the Dividends Received		
Deduction for Corporations		2.01%
Interest from Federal Obligations	0.80%	0.80%

Additionally, the following summarizes the per share long-term capital gain distributions paid by the Fund during the taxable year ended December 31, 2008:

	Payable Date:	Long-Term Capital Gain
Common Shareholders	5/30/2008	\$0.0265
Series M Preferred Shareholders	5/27/2008	\$ 14.81
Series M Preferred Shareholders	6/3/2008	16.27
Series M Preferred Shareholders	6/10/2008	15.40
Series M Preferred Shareholders	6/17/2008	14.81
Series M Preferred Shareholders	6/24/2008	10.74
Series W Preferred Shareholders	6/19/2008	\$ 41.77

The law varies in each state as to whether and what percentage of dividend income attributable to Federal obligations is exempt from state income tax. We recommend that you consult with your tax adviser to determine if any portion of the dividends you received is exempt from state income taxes.

Please retain this information for your records.

Trustees and Officers

The Trustees and officers of the Fund, their age (as of December 31, 2008) and a description of their principal occupations during the past five years are listed below. Except as shown, each Trustee's and officer's principal occupation and business experience for the last five years has been with the employer(s) indicated, although in some cases the Trustee or officer may have held different positions with such employer(s). Unless otherwise indicated, the business address of the persons listed below is c/o Western Asset Management Company, 385 East Colorado Blvd., Pasadena, California 91101.

^AEach officer bolds office until bis or ber respective successor is chosen and qualified, or in each case until be or she sooner dies, resigns, is removed with or without cause or becomes disqualified. Each of the Trustees of the Fund holds office until bis or ber successor shall have been duly elected and shall qualify, subject to prior death, resignation, retirement, disqualification or removal from office and applicable law and the rules of the New York Stock Exchange.

^BEach Trustee also serves as a Director of Western Asset Income Fund (closed-end investment company) and as a Director of Western Asset Funds, Inc. (open-end investment company), which are considered part of the same Fund Complex as the Fund. In addition, Mr. Gerken serves as Director/ Trustee to 159 other portfolios associated with Legg Mason & Co., LLC or its affiliates. Legg Mason & Co., LLC is an affiliate of Western Asset.

^cMr. Gerken is an "interested person" (as defined in section 2(a)(19) of the Investment Company Act of 1940, as amended (the "1940 Act")) of the Fund because of bis positions with subsidiaries of, and ownership of shares of common stock of, Legg Mason, Inc., the parent company of Western Asset.

^DMr. Olson is an "interested person" (as defined above) of the Fund because his law firm has provided legal services to Western Asset.

^{*E*} Each officer of the Fund is an "interested person" (as defined above) of the Fund.

Board Consideration of the Investment Advisory and Subadvisory Agreements

The Executive and Contracts Committee of the Board of Trustees considered the Investment Management Agreement (the "Management Agreement") between the Fund and Western Asset Management Company ("Western Asset") and the Portfolio Management Agreement (together with the Management Agreement, the "Agreements") between Western Asset Management Company and Western Asset Management Company Limited ("WAML") with respect to the Fund at meetings held on September 9, 2008, October 17, 2008 and October 30, 2008. At a meeting held on November 18, 2008, the Executive and Contracts Committee reported to the full Board of Trustees its considerations with respect to the Agreements, and the Board of Trustees, including a majority of the Independent Trustees, considered and approved renewal of the Agreements.

In arriving at their decision to renew the Agreements, the Trustees met with representatives of Western Asset and WAML (together, the "Advisers"), including relevant investment advisory personnel; reviewed a variety of information prepared by the Advisers and materials provided by Lipper Inc. ("Lipper") and counsel to the Independent Trustees; and reviewed performance and expense information for peer groups of comparable funds selected and prepared by Lipper. These reviews were in addition to information obtained by the Trustees at their regular quarterly meetings with respect to the Fund's performance and other relevant matters, such as information on differences between the Fund's share price and net asset value per share, and related discussions with the Advisers' personnel.

As part of their review, the Trustees examined the Advisers' ability to provide high quality investment management services to the Fund. The Trustees considered the investment philosophy and research and decision-making processes of the Advisers; the experience of their key advisory personnel responsible for management of the Fund; the ability of the Advisers to attract and retain capable research and advisory personnel; the capability and integrity of the Advisers' senior management and staff; and the level of skill required to manage the Fund. In addition, the Trustees reviewed the quality of the Advisers' services with respect to regulatory compliance and compliance with the investment policies of the Fund and conditions that might affect the Advisers' ability to provide high quality services to the Fund in the future under the Agreements, including the Advisers' business reputation, financial condition and operational stability. Based on the foregoing, the Trustees concluded that the Advisers' investment process, research capabilities and philosophy were well suited to the Fund given its investment objectives and policies, and that the Advisers would be able to meet any reasonably foreseeable obligations under the Agreements.

In reviewing the quality of the services provided to the Fund, the Trustees also reviewed comparisons of the performance of the Fund to the performance of certain comparable leveraged funds in two peer groups consisting of funds that invest at least 65% of their assets in corporate and government debt issues rated in the top four grades and one bond fund that does not have any quality or maturity restrictions. The Trustees noted that the performance of the Fund was well below average for the one- and three-year periods ended August 31, 2008 as compared to each peer group, but was approximately average compared to its peer groups for the five-year and since inception periods ended August 31, 2008.

The Trustees also considered the management fee and total expenses payable by the Fund. They reviewed information concerning management fees paid to investment advisers of similarly-managed funds, as well as fees paid by the Advisers' other clients, including separate accounts managed by the Advisers. The Trustees observed that the management fee paid by the Fund to Western Asset, whether measured as a percentage of net assets attributable to common shares or total assets, was below or at the median of each of its Lipper peer groups and that Western Asset was responsible for payment of the management fee to WAML. They noted that the management fee paid by the Fund was generally higher than the fees paid by other clients of the Advisers with similar investment strategies, but that the administrative and operational responsibilities for the Advisers with respect to the Fund were also relatively higher. In light of these differences, the Trustees concluded that the differences in management fees from those paid by the Advisers' other clients were reasonable. The Trustees also noted that although the Fund's total expenses were above the median of the funds in each of its Lipper peer groups the difference was primarily attributable to investment related expenses associated with the use of reverse repurchase agreements. The Trustees noted that the non-investment related expenses of the Fund, whether measured as a percentage of net assets attributable to common shares or total assets, were approximately average compared to its Lipper peer group.

The Trustees further evaluated the benefits of the advisory relationship to the Advisers, including, among others, the profitability of the relationship to the Advisers and the direct and indirect benefits that the Advisers may receive from their relationship with the Fund, including any "fallout benefits", such as reputational value derived from serving as investment adviser. In that connection, the Trustees concluded that the Advisers' profitability was consistent with levels of profitability that had been determined by courts not to be excessive.

Annual Report to Shareholders

Board Consideration of the Investment Advisory and Subadvisory Agreements —Continued

Finally, the Trustees considered, in light of the profitability information provided by the Advisers, the extent to which economies of scale would be realized by the Advisers as the assets of the Fund grow. The Trustees concluded that, because the Fund is a closed-end fund and does not make a continuous offer of its securities, the Fund's size was relatively fixed and it would be unlikely that the Advisers would realize economies of scale from the Fund's growth.

In their deliberations with respect to these matters, the Independent Trustees were advised by their independent counsel, who are independent of the Advisers within the meaning of the SEC rules regarding the independence of counsel. The Independent Trustees weighed the foregoing matters in light of the advice given to them by their independent counsel as to the law applicable to the review of investment advisory contracts. In arriving at a decision, the Trustees, including the Independent Trustees, did not identify any single matter as all-important or controlling, and the foregoing summary does not detail all the matters considered. The Trustees judged the terms and conditions of the Agreements, including the investment advisory fees, in light of all of the surrounding circumstances.

Based upon their review, the Trustees, including all of the Independent Trustees, determined, in the exercise of their business judgment, that they were generally satisfied with the quality of investment advisory services being provided by the Advisers, but would continue to closely monitor the Advisers' performance in light of the Fund's recent relative underperformance; that the fees to be paid to the Advisers under the Agreements were fair and reasonable, given the scope and quality of the services rendered by the Advisers; and that approval of the Agreements was in the best interest of the Fund and its shareholders.

Approval of Additional Subadvisers

At their September 9, 2008 meeting, the Trustees, including the Independent Trustees, approved the addition of the following two non-U.S. affiliates of Western Asset as additional investment subadvisers of the Fund: Western Asset Management Company Pte. Ltd. in Singapore ("Western Asset Singapore") and Western Asset Management Company Ltd in Japan ("Western Asset Japan" and together with Western Asset Singapore, the "New Subadvisers"). In approving the addition of the New Subadvisers, the Trustees drew on their knowledge of and experience with Western Asset, its personnel, the quality of the services it has provided to the Fund and its investment philosophy and performance, as well as additional information relating to the New Subadvisers. The Trustees noted that the Fund is permitted to invest in non-U.S. dollar denominated securities and related foreign currency instruments and that the addition of the New Subadvisers will provide the Fund with greater global investment management and trading resources. The Trustees also noted that although the New Subadvisers are separate legal entities from Western Asset, senior investment personnel at Western Asset have supervisory oversight responsibility over the investment decisions made by the New Subadvisers. Finally, the Trustees noted that the management fees paid by the Fund would not change as a result of the addition of the New Subadvisers since the Fund would not be paying the fees of the New Subadvisers.

Privacy Policy

The Fund is committed to keeping nonpublic personal information secure and confidential. This notice is intended to help a shareholder understand how the Fund fulfills this commitment.

From time to time, the Fund, through its service providers, may collect a variety of personal information, including:

- Information received on applications and forms, via the telephone, and through websites;
- Information about transactions with the Fund, affiliates, or others (such as purchases, sales, or account balances); and
- Information about shareholders received from consumer reporting agencies.

The Fund does not disclose shareholder nonpublic personal information, except as permitted by applicable law or regulation. For example, the Fund may share this information with others in order to process transactions. Any information provided to companies that perform services on behalf of the Fund, such as printing and mailing, or to other financial institutions with which the Fund has joint marketing agreements are required to protect the confidentiality of shareholders information and to use it only to perform the services for which the companies were hired.

The Fund, through its service providers, maintains physical, electronic, and procedural safeguards to protect shareholder non-public personal information. Access to this information is restricted.

If a shareholder decides at some point either to close his/her account(s) or become an inactive customer, the Fund will continue to adhere to these privacy policies and practices with respect to shareholder nonpublic personal information.
