## Western Asset Premier Bond Fund

### Fund Performance

Periods ended June 30, 2008

	Average Annual Total Returns			
	Six Months	One Year	Five Years	Since Inception <sup>A</sup>
Total Fund Investment Return Based on:				
Market Value	-2.55%	-9.58%	3.83%	5.51%
Net Asset Value	-7.08%	-7.91%	5.27%	6.92%
Lehman High Yield Index <sup>B</sup>	-1.31%	-2.26%	6.92%	7.86%
Lehman US Credit Index <sup>C</sup>	-0.48%	3.81%	3.27%	5.48%

The performance data quoted represents past performance and does not guarantee future results. The performance stated may have been due to extraordinary market conditions which may not be duplicated in the future. Current performance may be lower or higher than the performance data quoted. The investment return and principal value of the Fund will fluctuate so that an investor's shares, when sold, may be worth more or less than the original cost. Calculations assume reinvestment of dividends and capital gain distributions. Performance figures for periods shorter than one year represent cumulative figures and are not annualized.

The total return of the Fund, based on market value per share and including reinvestment of dividends and capital gain distributions for the six-month period ending June 30, 2008, was -2.55%. Based on net asset value (NAV), and including reinvestment of dividends and capital gain distributions for the six months ended June 30, 2008, the total return for the Fund was -7.08%. The Fund's discount to NAV declined to 3.47%. The Fund's exposure to non-agency mortgage-backed securities was the major drag on performance. Non-agency mortgage-backed securities detracted approximately 4% from performance. The Lehman Brothers ABS Home-Equity Index<sup>D</sup> returned -18.51% during the period. Returns were also negatively impacted by positions in auto and auto finance companies including General Motors (GM), Ford Company, and General Motors Acceptance Corp LLC (GMAC). For the period, GM returned -4.95%, Ford -10.80% and GMAC -19.47%. An overweight to financials was also a drag on performance, particularly the Fund's exposure to bank capital securities, which in general returned -3.44%.

### Market Commentary

The Federal Reserve Board ("Fed")<sup>E</sup> intensified its campaign against downside risks to growth during the six-month period ending June 30, 2008. The federal funds rate was reduced a cumulative 225 basis points (bps)<sup>F</sup>, 325 bps since Sept. 18, 2007, and a number of new lending facilities, designed to meet the liquidity demands of financial intermediaries across the full banking spectrum, were implemented. The June 30, 2008 period ended with the market contemplating the timing of rate hikes in the face of an extraordinary runup in commodity prices. Volatility remained high and the TED spread<sup>G</sup>, a measure of systemic risk, held at nearly three times year-ago levels before contracting gradually following the Bear Stearns rescue. Economic data were negative, though better than generally expected. Sales of new and existing homes continued to fall—despite significant home price depreciation—and gross domestic product growth continued to be hampered by deep cuts in homebuilding. Consumer confidence fell as labor market conditions deteriorated, though fiscal stimulus seems to have given household spending a temporary boost. Headline inflation measures remained elevated—oil prices surged 46%—but core inflation eased a touch. The U.S. dollar lost roughly 5.5% against a trade-weighted basket of currencies, although it did show some signs of stability in the final months. Credit spreads widened to historic levels through mid-March before rebounding during April and May. June saw spreads give back some of those gains as the idea that monetary policy may become more restrictive despite rising unemployment, plunging home values, and ongoing restricted credit extension was too much for investors to stomach.

<sup>A</sup>The Fund's inception date is March 28, 2002.

<sup>B</sup>Lehman High Yield Index – A market value-weighted index that tracks the daily price, coupon, and total return performance of non-investment grade, fixed rate, publicly placed, dollar-denominated, and non-convertible debt registered with the U.S. Securities and Exchange Commission. An index does not incur fees and expenses and cannot be purchased directly by investors.

<sup>C</sup>Lehman US Credit Index – This index consists of publicly issued U.S. corporate and specified foreign debentures and secured notes that meet the specified maturity, liquidity, and quality requirements. To qualify, bonds must be SEC-registered. The index includes both corporate (industrial, utility and finance) and non-corporate (sovereign, supranational, foreign agency, and foreign local government) sectors.

<sup>D</sup>Lehman Brothers ABS Home-Equity Index – A fixed-income index that focuses on asset-backed securities. The Lehman Brothers Asset-Backed Securities Index serves as the performance benchmark for many ABS funds. The index includes pass-through, controlled-amortization and bullet-structured securities, which have a minimum average life of one year.

<sup>E</sup>Federal Reserve Board ("Fed") – is charged with, among other things, managing the nation's monetary policy by influencing the monetary and credit conditions in the economy in pursuit of maximum employment, stable prices, and moderate long-term interest rates.

<sup>F</sup>100 basis points (bps) = 1.00%

<sup>G</sup>Ted Spread (Ted) – The price difference between three-month futures contracts for U.S. Treasuries and three-month contracts for euros having identical expiration months.

The Investment Commentary is not a part of the Semi-Annual Report to Shareholders.

## Portfolio Manager Comments

The Lehman US Credit Index returned -0.48% for the six-month period ending June 30, 2008. The option adjusted spread (OAS)<sup>H</sup> of the Lehman US Credit Index widened 57 bps, ending the period at +238 bps, one of the widest month-end readings on record. Credit significantly underperformed U.S. Treasuries for the period as the Lehman US Credit Index generated 285 bps of negative excess return. Excess return compares corporate bond performance versus the performance of similar duration U.S. Treasuries. In general, industrials outperformed utilities and utilities outperformed financials. Spread widening and relative underperformance for corporate bonds was the direct result of investors' rising concern about the macroeconomic environment as well as increasing systemic risk in the financial sector. Corporate bonds appeared to have weathered the storm brought on by the housing slump in the aftermath of the government assisted acquisition by JPMorgan of Bear Stearns in mid-March. Corporate bonds rallied sharply, which was almost completely reversed when leaks in the dam continued to sprout. Citigroup announced in mid-June it would take a "significant" charge against second quarter earnings due to subprime related holdings. Regional banks and other financial institutions with large stakes in the housing market tumbled anew, including the government-sponsored entities Fannie Mae and Freddie Mac, which combined originated 75% of U.S. home loans during the period. Additionally, energy prices soared during the period—adding fuel to the fire that the macroeconomic environment was at risk for deteriorating further.

No doubt the credit markets face significant obstacles to meaningful improvement. However, the degree of negativity priced into the credit market is greater than we believe is reasonable. Financials face the prospect of another quarter of disastrous earnings, however, we believe that year-over-year earnings comparisons will most likely show improvement starting in the third quarter. Away from the financial and consumer discretionary sectors, all other sectors have had positive earnings growth and are forecasted to remain so going forward according to Bloomberg consensus estimates. That said, the end-of-June's reading of the option-adjusted spread on the Lehman US Credit Index, at +238 bps, is wider than those seen at any time during the 1980, 1981-1982, 1990-1991, or 2001 recessions and wider than the worst levels experienced during the savings and loan crisis of the late 1980s and early 1990s. Western Asset believes that economic activity will pick up in the second half of the year and therefore views current valuations as attractive.

Since February 2008, auctions for the Fund's currently outstanding auction rate preferred securities ("ARPS") have failed due to lack of adequate bids. On May 22, 2008, the Fund announced its intention to redeem all of its currently outstanding ARPS. The Fund is in negotiations to obtain a bank credit facility to finance the redemption and it is anticipated the Fund will begin redeeming its ARPS during the fourth quarter of 2008. While management of the Fund expects to reach a definitive agreement with the bank to obtain the credit facility, there can be no assurance that the Fund will enter into a definitive credit facility or that the ARPS will be redeemed.

Western Asset Management Company

July 21, 2008

*Investment Risks: Bonds are subject to a variety of risks, including interest rate, credit and inflation risk. As interest rates rise, bond prices fall, reducing the value of a fixed income investment's price. The Fund may invest in high-yield bonds, which are rated below investment grade and carry more risk than higher-rated securities. To the extent that the Fund invests in asset-backed, mortgage-backed or mortgage-related securities, its exposure to prepayment and extension risks may be greater than investments in other fixed income securities.*

*The views expressed in this commentary reflect those of Western Asset Management Company's Investment Advisory Team as of the date of this commentary and may differ from those of the firm as a whole or from the portfolio managers of Legg Mason Inc.'s other affiliates. Any such views are subject to change at any time based on market or other conditions, and Western Asset Premier Bond Fund ("Fund") and Western Asset Management Company disclaim any responsibility to update such views. These views are not intended to be a forecast of future events, a guarantee of future results or advice. Because investment decisions for the Fund are based on numerous factors, these views may not be relied upon as an indication of trading intent on behalf of the Fund. Forecasts are inherently limited and should not be relied upon as an indicator of future results or used as the basis for investment decisions. The information contained herein has been prepared from sources believed to be reliable, but is not guaranteed by Western Asset Premier Bond Fund or Western Asset Management Company as to its accuracy or completeness.*

<sup>H</sup>Option-adjusted spread (OAS) – The spread at which a security would trade over a benchmark if it had no embedded optionality. OAS is calculated as the instrument's current spread over the benchmark yield minus that component of the spread that is attributable to the cost of the embedded options.

Per Common Share	\$0.02	\$0.09

## The Fund

Western Asset Premier Bond Fund (“WEA” or the “Fund”) is a diversified, closed-end management investment company which seeks to provide current income and capital appreciation for its shareholders by investing primarily in a diversified portfolio of investment grade bonds. Substantially all of the Fund’s net investment income (after payment of dividends to holders of preferred shares and interest in connection with other forms of leverage (if applicable)) is distributed to the Fund’s common shareholders. A Dividend Reinvestment Plan is available to those common shareholders of record desiring it. The Fund’s common shares are listed on the New York Stock Exchange (“NYSE”) where they trade under the symbol WEA.

## Investment Policies

Each limitation below applies only at the time a transaction is entered into. Any subsequent change in a rating assigned to a security, or change in the percentage of the Fund’s assets invested in certain securities or other instruments, resulting from market fluctuations or other changes in the Fund’s total assets, will not require the Fund to dispose of an investment.

Under normal market conditions, the Fund expects to:

- Invest substantially all (but at least 80%) of its total managed assets in bonds, including corporate bonds, U.S. government and agency securities and mortgage related securities.
- Invest at least 65% of its total managed assets in bonds that at the time of investment are investment grade quality. The Fund may invest up to 35% of its total managed assets in bonds of below grade quality.

The Fund may invest in securities or instruments other than bonds (including preferred stock) and may invest up to 10% of its total managed assets in instruments denominated in currencies other than the U.S. dollar.

## Dividend Reinvestment Plan

The Fund and Computershare Trust Company N.A. (“Agent”), as the Transfer Agent and Registrar of the Fund, offer a convenient way to add shares of the Fund to your account. The Fund offers to all common shareholders a Dividend Reinvestment Plan (“Plan”). Under the Plan, cash distributions (e.g., dividends and capital gains) on the common shares are automatically invested in shares of the Fund unless the shareholder elects otherwise by contacting the Agent at the address set forth below.

As a participant in the Dividend Reinvestment Plan you will automatically receive your dividend or net capital gains distribution in newly issued shares of the Fund if the market price of a share on the date of the distribution is at or above the NAV of a Fund share, minus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market. The number of shares to be issued to you will be determined by dividing the amount of the cash distribution to which

you are entitled (net of any applicable withholding taxes) by the greater of the NAV per share on such date or 95% of the market price of a share on such date. If the market price of a share on such distribution date is below the NAV, minus estimated brokerage commissions that would be incurred upon the purchase of common shares on the open market, the Agent will, as agent for the participants, buy shares of the Fund through a broker on the open market. The price per share of shares purchased for each participant's account with respect to a particular dividend or other distribution will be the average price (including brokerage commissions, transfer taxes and any other costs of purchase) of all shares purchased with respect to that dividend or other distribution. All common shares acquired on your behalf through the Plan will be automatically credited to an account maintained on the books of the Agent. Full and fractional shares will be voted by Computershare in accordance with your instructions.

## Additional Information Regarding the Plan

The Fund will pay all costs applicable to the Plan, except for brokerage commissions for open market purchases by the Agent under the Plan, which will be charged to participants. All shares acquired through the Plan receive voting rights and are eligible for any stock split, stock dividend, or other rights accruing to shareholders that the Board of Trustees may declare.

You may terminate participation in the Plan at any time by giving written notice to the Agent. Such termination will be effective prior to the record date next succeeding the receipt of such instructions or by a later date of termination specified in such instructions. Upon termination, a participant will receive a certificate for the full shares credited to his or her account or may request the sale of all or part of such shares. Fractional shares credited to a terminating account will be paid for in cash at the current market price at the time of termination.

Dividends and other distributions invested in additional shares under the Plan are subject to income tax just as if they had been received in cash. After year end, dividends paid on the accumulated shares will be included in the Form 1099-DIV information return to the Internal Revenue Service (IRS) and only one Form 1099-DIV will be sent to participants each year.

Inquiries regarding the Plan, as well as notices of termination, should be directed to Computershare Trust Company, N.A. P.O. Box 43010, Providence, Rhode Island 02940-3010—Investor Relations Telephone number 1-800-426-5523.

## Schedule of Portfolio Holdings

The Fund files a complete schedule of its portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. You may obtain a free copy of the Fund's Form N-Q by calling 1-800-799-4932 or by writing to the Fund, or you may obtain a copy of this report (and other information relating to the Fund) from the Securities and Exchange Commission's ("SEC") website (<http://www.sec.gov>). Additionally, the Fund's Form N-Q can be viewed or copied at the SEC's Public Reference Room in Washington D.C. Information about the operation of the Public Reference Room can be obtained by calling 1-202-551-8090.

## Proxy Voting

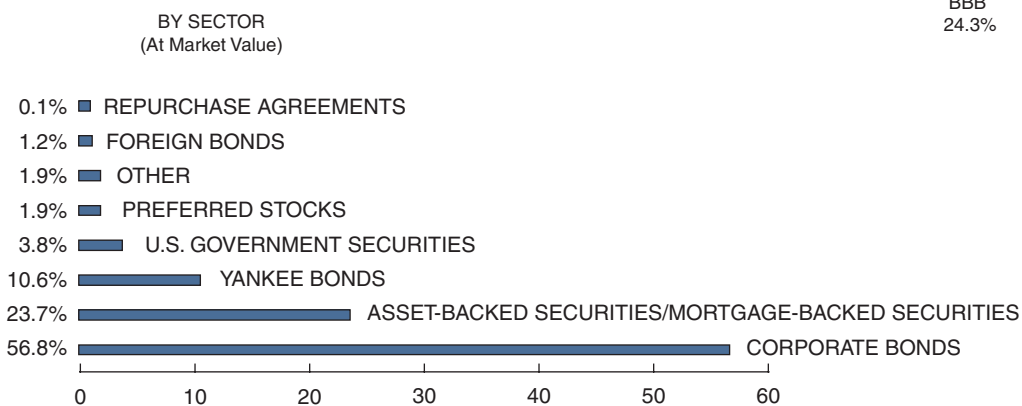

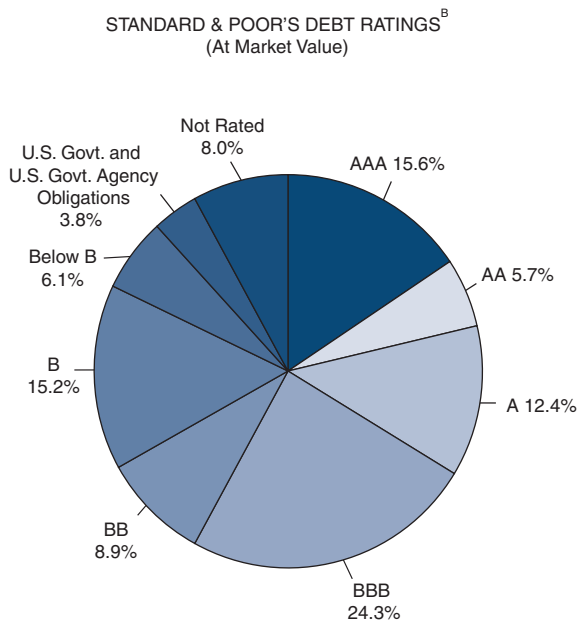

You may request a free description of the policies and procedures that the Fund uses to determine how proxies relating to the Fund's portfolio securities are voted by calling 1-800-799-4932 or by writing to the Fund, or you may obtain a copy of these policies and procedures (and other information relating to the Fund) from the SEC's web site (<http://www.sec.gov>). You may request a free report regarding how the Fund voted proxies relating to portfolio securities during the most recent twelve-month period ended June 30 by calling 1-800-799-4932 or by writing to the Fund, or you may obtain a copy of this report (and other information relating to the Fund), from the SEC's website (<http://www.sec.gov>).

## Quarterly Comparison of Market Price and Net Asset Value ("NAV"), Discount or Premium to NAV and Average Daily Volume of Shares Traded

	Market Price	Net Asset Value	Premium/ (Discount)	Average Daily Volume/(Shares)
September 30, 2007	\$14.14	\$14.90	(5.10)%	23,411
December 31, 2007	\$13.13	\$14.26	(7.92)%	22,933
March 31, 2008	\$12.43	\$12.99	(4.31)%	20,549
June 30, 2008	\$12.24	\$12.68	(3.47)%	18,877

Portfolio Diversification

June 30, 2008<sup>A</sup>

The pie and bar charts above represent the composition of the Fund's portfolio as of June 30, 2008 and do not include derivatives such as Futures Contracts, Options Written, and Credit Default Swaps.

<sup>A</sup> The Fund is actively managed. As a result, the composition of its portfolio holdings and sectors is subject to change at any time.

<sup>B</sup> Standard & Poor's Ratings Services provides capital markets with credit ratings for the evaluation and assessment of credit risk.

N.M. Not Meaningful.

<sup>A</sup> Rule 144A Security – A security purchased pursuant to Rule 144A under the Securities Act of 1933 which may not be resold subject to that rule except to qualified institutional buyers. These securities, which the Fund's investment adviser has determined to be liquid, represent 24.75% of net assets.

<sup>B</sup> Pay-in-Kind ("PIK") security – A security in which interest or dividends during the initial few years is paid in additional PIK securities rather than in cash.

<sup>C</sup> Indexed Security – The rates of interest earned on these securities are tied to the London Interbank Offered Rate ("LIBOR"), the Euro Interbank Offered Rate ("EURIBOR") Index, the Consumer Price Index ("CPI"), the one-year Treasury Bill Rate or the ten-year Japanese Government Bond Rate. The coupon rates are the rates as of June 30, 2008.

<sup>D</sup> Stepped Coupon Security – A security with a predetermined schedule of interest or dividend rate changes at which time it begins to accrue interest or pay dividends according to the predetermined schedule.

<sup>E</sup> Yankee Bond – A dollar-denominated bond issued in the U.S. by foreign entities.

<sup>F</sup> Convertible Security – Security may be converted into the issuer's common stock.

<sup>G</sup> Credit Linked Security – The rates of interest earned on these securities are tied to the credit rating assigned by Standard & Poor's Rating Service and/or Moody's Investors Services.

<sup>H</sup> Bonds are in default.

<sup>I</sup> Illiquid security valued at fair value under the procedures approved by the Board of Directors.

<sup>J</sup> Stripped Security – Security with interest-only or principal-only payment streams, denoted by a 1 or 2, respectively. For interest-only securities, the amount shown as principal is the notional balance used to calculate the amount of interest due.

<sup>K</sup> The coupon rates shown on variable rate securities are the rates at June 30, 2008. These rates vary with the weighted average coupon of the underlying loans.

<sup>L</sup> When-issued Security – Security purchased on a delayed delivery basis. Final settlement amount and maturity date have not yet been announced.

<sup>M</sup> Inflation-Protected Security – Security whose principal value is adjusted daily or monthly in accordance with changes to the relevant country's Consumer Price Index or its equivalent used as an inflation proxy. Interest is calculated on the basis of the current adjusted principal value.

<sup>N</sup> Zero coupon bond – A bond with no periodic interest payments which is sold at such a discount as to produce a current yield to maturity.

<sup>O</sup> Aggregate cost for federal income tax purposes is substantially the same as book cost. At June 30, 2008, the aggregate gross unrealized appreciation and depreciation of investments for federal income tax purposes were substantially as follows:

Gross unrealized appreciation	\$ 6,924,298
Gross unrealized depreciation	<u>(17,797,011)</u>
Net unrealized depreciation	<u>\$(10,872,713)</u>

† Securities are denominated in U.S. Dollars, unless otherwise noted.

ARS—Argentine Peso

EGP—Egyptian Pound

RUB—Russian Ruble

Liquidation and market value per share (in thousands)	\$ 25	\$ 25	\$ 25	\$ 25	\$ 25	\$ 25

<sup>A</sup> Computed using average daily shares outstanding.

<sup>B</sup> Not annualized.

<sup>C</sup> Total expenses reflects operating expenses prior to any voluntary expense waivers and/or compensating balance credits. Expenses net of waivers reflects total expenses before compensating balance credits but net of any voluntary expense waivers. Expenses net of all reductions reflects expenses less any compensating balance credits and/or voluntary expense waivers.

<sup>D</sup> Annualized.

<sup>E</sup> Ratios are calculated on the basis of income and expenses applicable to both the common and preferred shares relative to the average net assets of common shareholders. Ratios of net investment income before preferred share dividends to average net assets of common shareholders are 10.91%, 8.46%, 8.45%, 9.21%, 8.99% and 8.85%, respectively.

<sup>F</sup> Asset coverage on preferred shares equals net assets of common shares plus the redemption value of the preferred shares divided by the amount to which holders of such shares would be entitled upon redemption of the preferred shares.

See notes to financial statements.

## Notes to Financial Statements

(Unaudited)

### 1. Significant Accounting Policies:

Western Asset Premier Bond Fund (the “Fund”) is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as a diversified, closed-end management investment company. The Fund commenced investment operations on March 28, 2002.

The Fund’s investment objective is to provide current income and capital appreciation by investing primarily in a diversified portfolio of investment grade bonds. The Fund currently seeks to achieve its investment objective by investing substantially all of its assets in bonds, including corporate bonds, U.S. government and agency securities and mortgage-related securities. The ability of the issuers of the securities held by the Fund to meet their obligations might be affected by, among other things, economic developments in a specific state, industry or region.

Preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates. The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements:

#### Investment Valuation

The Fund’s securities are valued under policies approved by and under the general oversight of the Board of Trustees. Effective January 1, 2008, the Fund adopted Statement of Financial Accounting Standards No. 157 (“FAS 157”). FAS 157 establishes a single definition of fair value, creates a three-tier hierarchy as a framework for measuring fair value based on inputs used to value the Fund’s investments, and requires additional disclosure about fair value. The hierarchy of inputs is summarized below.

- Level 1—quoted prices in active markets for identical investments
- Level 2—other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)
- Level 3—significant unobservable inputs (including the Fund’s own assumptions in determining the fair value of investments)

Debt securities are valued at the last quoted bid prices provided by an independent pricing service that are based on transactions in debt obligations, quotations from bond dealers, market transactions in comparable securities and various other relationships between securities. Equity securities for which market quotations are available are valued at the last sale price or official closing price on the primary market or exchange on which they trade. Publicly traded foreign government debt securities are typically traded internationally in the over-the-counter market and are valued at the bid price as of the close of business of that market. When prices are not readily available, or are determined not to reflect fair value, such as when the value of a security has been significantly affected by events after the close of the exchange or market on which the security is principally traded, but before the Fund calculates its net asset value, the Fund may value these securities at fair value as determined in accordance with the procedures approved by the Fund’s Board of Trustees.

The following is a summary of the inputs used in valuing the Fund’s assets carried at fair value:

	06/30/2008	Quoted Prices (Level 1)	Other Significant Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Investments in Securities	\$230,745,896	\$8,879,564	\$221,866,322	\$—
Other Financial Instruments*:				
Derivatives	(10,786,423)	—	(10,786,423)	—
Reverse Repurchase Agreements	(15,381,000)	—	(15,381,000)	—
Total Value	<u>\$204,578,473</u>	<u>\$8,879,564</u>	<u>\$195,698,909</u>	<u>\$—</u>

\* Other financial instruments include reverse repurchase agreements and derivatives, e.g. swaps contracts.

## Security Transactions

Security transactions are accounted for as of the trade date. Realized gains and losses from security transactions are reported on an identified cost basis for both financial reporting and federal income tax purposes.

For the six months ended June 30, 2008, security transactions (excluding short-term investments) were as follows:

Purchases		Proceeds from Sales	
U.S. Gov't. Securities	Other	U.S. Gov't. Securities	Other
\$28,465,125	\$40,607,400	\$49,028,313	\$21,840,187

## Foreign Currency Translation

Assets and liabilities initially expressed in non-U.S. currencies are translated into U.S. dollars using currency exchange rates determined prior to the close of trading on the New York Stock Exchange, usually at 2:00 p.m. Eastern time. Purchases and sales of securities and income and expenses are translated into U.S. dollars at the prevailing market rates on the dates of such transactions. The effects of changes in non-U.S. currency exchange rates on investment securities and other assets and liabilities are included with the net realized and unrealized gain or loss on investment securities.

## Repurchase Agreements

The Fund may engage in repurchase agreement transactions. Under the terms of a typical repurchase agreement, a fund takes possession of an underlying debt obligation subject to an obligation of the seller to repurchase, and a fund to resell, the obligation at an agreed-upon price and time, thereby determining the yield during the fund's holding period. This arrangement results in a fixed rate of return that is not subject to market fluctuations during the fund's holding period. The value of the collateral is at all times at least equal to the total amount of the repurchase obligation, including interest. In the event of counterparty default, a fund has the right to use the collateral to satisfy the terms of the repurchase agreement. However, there could be potential loss to the fund in the event the fund is delayed or prevented from exercising its right to dispose of the collateral securities, including the risk of a possible decline in the value of the collateral securities during the period in which the fund seeks to assert its rights. The Fund's investment adviser reviews the value of the collateral and the creditworthiness of those banks and dealers with which the Fund enters into repurchase agreements to evaluate potential risks.

## Reverse Repurchase Agreements

The Fund may enter into reverse repurchase agreements. Under the terms of a typical reverse repurchase agreement, a fund sells a security subject to an obligation to repurchase the security from the buyer at an agreed-upon time and price, thereby determining the yield to the buyer during the buyer's holding period. A reverse repurchase agreement involves the risk, among others, that the market value of the collateral retained by the fund may decline below the price of the securities the fund has sold but is obligated to repurchase under the agreement. In the event the buyer of securities under a reverse repurchase agreement files for bankruptcy or becomes insolvent, the fund's use of the proceeds of the agreement may be restricted pending a determination by the party, or its trustee or receiver, whether to enforce the Fund's obligation to repurchase the securities. In entering into reverse repurchase agreements, the Fund will maintain cash, U.S. government securities or other liquid debt obligations at least equal in value to its obligations with respect to reverse repurchase agreements or will take other actions permitted by law to cover its obligations.

## Options, Futures and Swap Agreements

The current market value of an exchange traded option is the last sale price or, in the absence of a sale, the mean between the closing bid and asked price. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded. Futures contracts are marked-to-market on a daily basis. As the contract's value fluctuates, payments known as variation margin are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses, and the Fund recognizes a gain or loss when the contract is closed. Swap agreements are generally priced daily based upon valuations furnished by an independent pricing service and the change, if any, is recorded as unrealized appreciation or depreciation.

## Forward Currency Exchange Contracts

As part of its investment program, the Fund may utilize forward currency exchange contracts. Forward foreign exchange contracts are marked-to-market daily using foreign currency exchange rates supplied by an independent pricing service. The change

### **Notes to Financial Statements—Continued**

in the contract's market value is recorded by the Fund as an unrealized gain or loss. When a contract is closed or delivery is taken, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

The use of forward foreign currency exchange contracts does not eliminate fluctuations in the underlying prices of the Fund's securities, but it does establish a rate of exchange that can be achieved in the future. These forward foreign currency exchange contracts involve market risk in excess of amounts reflected in the financial statements. Although forward foreign currency exchange contracts used for hedging purposes limit the risk of loss due to the decline in the value of the hedged currency, they also limit any potential gain that might result should the value of the currency increase. In addition, the Fund could be exposed to risks if the counterparties to the contracts are unable to meet the terms of their contracts.

The Fund had no outstanding forward foreign currency exchange contracts as of June 30, 2008.

#### ***Short Sales***

The Fund may sell a security it does not own in anticipation of a decline in the market price of that security. The Fund must then borrow the security sold short and deliver it to the dealer that brokered the short sale. A gain, limited to the price at which the security was sold short, or a loss, potentially unlimited in size, will be recognized upon the termination of the short sale. With respect to each short sale, the Fund must maintain collateral in a segregated account consisting of liquid assets with a value at least equal to the current market value of the shorted securities, marked-to-market daily, or take other actions permitted by law to cover its obligations. Dividend expenses and fees paid to brokers to borrow securities in connection with short sales are considered part of the cost of short sale transactions. Dividends declared on securities sold short are recorded as an expense on the ex-dividend date.

The Fund had no open short sales as of June 30, 2008.

#### ***Distributions to Common Shareholders***

Investment income and distributions to shareholders are recorded on the ex-dividend date. Dividends from net investment income are declared and paid monthly. Net capital gain distributions are declared and paid after the end of the tax year in which the gain is realized. An additional distribution may be made in December to the extent necessary in order to comply with federal excise tax requirements. Distributions are determined in accordance with federal income tax regulations, which may differ from those determined in accordance with accounting principles generally accepted in the United States of America; accordingly, periodic reclassifications are made within the Fund's capital accounts to reflect income and gains available for distribution under federal income tax regulations. Interest income and expenses are recorded on the accrual basis. Bond discounts and premiums are amortized and included in interest income for financial reporting and federal income tax purposes.

#### ***Compensating Balance Credits***

The Fund has an arrangement with its custodian bank, whereby a portion of the custodian's fee is paid indirectly by credits earned on the Fund's cash on deposit with the bank. This deposit arrangement is an alternative to purchasing overnight investments.

#### ***Use of Estimates***

The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from these estimates.

#### ***Credit and Market Risk***

Investments in structured securities collateralized by residential real estate mortgages are subject to certain credit and liquidity risks. When market conditions result in an increase in default rates of the underlying mortgages and the foreclosure values of underlying real estate properties are materially below the outstanding amount of these underlying mortgages, collection of accrued interest and principal on these investments may be doubtful. Such market conditions may significantly impair the value of these investments resulting in a lack of correlation between their credit ratings and values.

## Other

In the normal course of business, the Fund enters into contracts that provide general indemnifications. The Fund's maximum exposure under these arrangements is dependent upon claims that may be made against the Fund in the future and, therefore, cannot be estimated; however, based on experience, the risk of material loss from such claims is considered remote.

## 2. Federal Income Taxes:

It is the Fund's policy to continue to comply with the federal income and excise tax requirements of the Internal Revenue Code of 1986, as amended, applicable to regulated investment companies. Accordingly, the Fund intends to distribute substantially all of its in-come and net realized gains on investments, if any, to shareholders each year. Therefore, no federal income tax provision is required in the Fund's financial statements.

Management has analyzed the Fund's tax positions taken on federal income tax returns for all open tax years and has concluded that as of June 30, 2008 no provision for income tax would be required in the Fund's financial statements. The Fund's federal and state income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state departments of revenue.

The amount and character of tax-basis distributions and composition of net assets are finalized at fiscal year-end; accordingly, tax basis balances have not been determined as of June 30, 2008.

## 3. Financial Instruments:

### Option Transactions

As part of its investment program, the Fund may utilize options. Options may be written (sold) or purchased by the Fund. When the Fund purchases a put or call option, the premium paid is recorded as an investment and its value is marked-to-market daily. When the Fund writes a put or call option, an amount equal to the premium received by the Fund is recorded as a liability and its value is marked-to-market daily.

When options, whether written or purchased, expire, are exercised or are closed (by entering into a closing purchase or sale transaction), the Fund realizes a gain or loss as described in the chart below:

Purchased option:	Impact on the Fund:
The option expires	Realize a loss in the amount of the cost of the option.
The option is closed through a closing sale transaction	Realize a gain or loss depending on whether the proceeds from the closing sale transaction are greater or less than the cost of the option.
The Fund exercises a call option	The cost of the security purchased through the exercise of the option will be increased by the premium originally paid to purchase the option.
The Fund exercises a put option	Realize a gain or loss from the sale of the underlying security. The proceeds of that sale will be reduced by the premium originally paid to purchase the put option.
Written option:	Impact on the Fund:
The option expires	Realize a gain equal to the amount of the premium received.
The option is closed through a closing purchase transaction	Realize a gain or loss without regard to any unrealized gain or loss on the underlying security and eliminate the option liability. The Fund will realize a loss in this transaction if the cost of the closing purchase exceeds the premium received when the option was written.
A written call option is exercised by the option purchaser	Realize a gain or loss from the sale of the underlying security. The proceeds of that sale will be increased by the premium originally received when the option was written.
A written put option is exercised by the option purchaser	The amount of the premium originally received will reduce the cost of the security that the Fund purchased when the option was exercised.

### **Notes to Financial Statements—Continued**

The risk associated with purchasing options is limited to the premium originally paid. Options written by the Fund involve, to varying degrees, risk of loss in excess of the option value reflected in the statement of assets and liabilities. The risk in writing a covered call option is that the Fund may forgo the opportunity of profit if the market price of the underlying security increases and the option is exercised. The risk in writing a put option is that the Fund may incur a loss if the market price of the underlying security decreases and the option is exercised. In addition, there is the risk the Fund may not be able to enter into a closing transaction because of an illiquid secondary market or, for over-the-counter options, because of the counterparty's inability to perform.

There was no activity in written options during the six months ended June 30, 2008.

#### ***Futures***

Upon entering into a futures contract, the Fund is required to deposit with the broker cash or cash equivalents in an amount equal to a certain percentage of the contract amount. This is known as the "initial margin." Subsequent payments ("variation margin") are made or received by the Fund each day, depending on the daily fluctuation in the value of the contract. The daily changes in contract value are recorded as unrealized gains or losses and the Fund recognizes a realized gain or loss when the contract is closed. Futures contracts are valued daily at the settlement price established by the board of trade or exchange on which they are traded.

The Fund may enter into futures contracts as a hedge against anticipated changes in interest rates. There are several risks in connection with the use of futures contracts as a hedging device. Futures contracts involve, to varying degrees, risk of loss in excess of the amounts reflected in the financial statements. The change in the value of futures contracts primarily corresponds with the value of their underlying instruments, which may not correlate with the change in the value of the hedged instruments. In addition, there is the risk that a Fund may not be able to enter into a closing transaction because of an illiquid secondary market.

Open futures positions and related appreciation or depreciation at June 30, 2008, if any, are listed at the end of the Fund's portfolio of investments.

#### ***Reverse Repurchase Agreements***

As of June 12, 2008, the Fund had entered into a reverse repurchase agreement ("Reverse Repurchase Agreement") with Deutsche Bank. The Reverse Repurchase Agreement, which matured on July 17, 2008 at an interest rate of 2.75%, was recorded at cost of \$15,381,000 and was collateralized by U.S. Government securities and corporate bonds with a par value of \$16,125,000 and a market value as of June 30, 2008, of \$15,422,123.

For the six months ended June 30, 2008, the average amount of Reverse Repurchase Agreements outstanding was \$5,960,367 and the daily weighted average interest rate was 3.13%.

#### ***Swap Agreements***

The Fund may invest in swaps for the purpose of managing their exposure to interest rate, credit or market risk, or for other purposes. The use of swaps involves risks that are different from those associated with ordinary portfolio transactions.

Credit default swaps involve the exchange of a fixed rate premium for protection against the loss in value of an underlying debt instrument in the event of a defined credit event (such as payment default or bankruptcy). Under the terms of the swap, one party acts as a "guarantor," receiving a periodic payment that is a fixed percentage applied to a notional principal amount. In return, the party agrees to purchase the notional amount of the underlying instrument, at par, if a credit event occurs during the term of the swap. The Fund may enter into credit default swaps in which the Fund or its counterparty act as guarantors. By acting as the guarantor of a swap, the Fund assumes the market and credit risk of the underlying instrument, including liquidity and loss of value.

Swaps are marked-to-market daily and changes in value are recorded as unrealized appreciation/(depreciation). Gains or losses are realized upon termination of the swap agreement. Periodic payments and premiums received or made by a Fund are recorded in the accompanying statement of operations as realized gains or losses, respectively. Collateral, in the form of restricted

cash or securities, may be required to be held in segregated accounts with the Fund's custodian in compliance with the terms of the swap contracts. Risks may exceed amounts recognized on the statement of assets and liabilities. These risks include changes in the returns of the underlying instruments, failure of the counterparties to perform under the contracts' terms, and the possible lack of liquidity with respect to the swap agreements.

If the Fund is a seller of protection and a credit event occurs, as defined under the terms of the particular swap agreement, the Fund will pay to the buyer of the protection an amount up to the notional value of the swap and in certain instances, take delivery of the security.

As of June 30, 2008, the annualized one- and three-month London Interbank Offered Rates ("LIBOR") were 2.46% and 2.78%, respectively.

The following is a summary of open credit default swap contracts outstanding as of June 30, 2008.

<u>Agreement With:</u>	<u>Termination Date</u>	<u>The Fund Agrees to Pay<sup>D</sup></u>	<u>The Fund Will Receive<sup>D</sup></u>	<u>Contract Notional Amount</u>	<u>Unrealized Appreciation/ (Depreciation)</u>

#### 4. Common Shares:

Of the 11,474,540 shares of common stock outstanding at June 30, 2008, Western Asset owns 11,975 shares.

#### 5. Preferred Shares:

There are 2,880 shares of Auction Market Preferred Shares ("Preferred Shares") authorized. The Preferred Shares have rights as set forth in the Fund's Agreement and Declaration of Trust, as amended to date, and its Bylaws, as amended to date (the "Bylaws"), or as otherwise determined by the Trustees. The 2,880 Preferred Shares outstanding consist of two series, 1,440 shares of Series M and 1,440 shares of Series W. The Preferred Shares have a liquidation value of \$25,000 per share, plus any accumulated but unpaid dividends whether or not earned or declared.

### Notes to Financial Statements—Continued

Dividends on the Series M and Series W Preferred Shares are cumulative and are paid at a rate typically reset every seven and twenty-eight days, respectively, based on the results of an auction. Dividend rates ranged from 2.91% to 5.60% between January 1, 2008 to June 30, 2008. Under the Investment Company Act of 1940, the Fund may not declare dividends or make other distributions on common shares or purchase any such shares if, at the time of the declaration, distribution or purchase, asset coverage with respect to the outstanding Preferred Shares would be less than 200%.

The Preferred Shares are redeemable at the option of the Fund, in whole or in part, on the second business day preceding any dividend payment date at \$25,000 per share plus any accumulated but unpaid dividends. The Preferred Shares are also subject to mandatory redemption at \$25,000 per share plus any accumulated but unpaid dividends, whether or not earned or declared, if certain requirements relating to the composition of the assets and liabilities of the Fund as set forth in the Bylaws are not satisfied.

Preferred shareholders, who are entitled to one vote per Preferred Share, generally vote as a single class with the common shareholders, but will vote separately as a class (and, in certain circumstances, vote separately by series) with respect to certain matters set forth in the Bylaws. The preferred shareholders are entitled to elect two Trustees of the Fund.

#### 6. Securities Lending:

Subject to applicable restrictions in the Fund's Bylaws, the Fund may lend its securities to approved brokers to earn additional income, and will receive cash and U.S. government securities as collateral against the loans. Cash collateral received is invested in a money market pooled account by the Fund's lending agent. Collateral is maintained over the life of the loan in an amount not less than 100% of the value of the loaned securities. As of June 30, 2008, there were no securities on loan.

#### 7. Transactions with Affiliates:

The Fund has a management agreement with Western Asset Management Company ("Western Asset"). Pursuant to the terms of the management agreement, the Fund pays Western Asset an annual fee, payable monthly, in an amount equal to 0.55% of the average weekly value of the Fund's total managed assets. "Total managed assets" means the total assets of the Fund (including any assets attributable to leverage) minus accrued liabilities. The liquidation preference of any Preferred Shares outstanding is not considered a liability. Pursuant to a Portfolio Management Agreement between Western Asset and Western Asset Management Company Limited ("WAML"), Western Asset pays a portion of the fees it receives from the Fund to WAML at an annual rate of 0.425% of the average weekly value of the Fund's total managed assets that WAML manages. Western Asset and WAML are wholly owned subsidiaries of Legg Mason, Inc.

On May 1, 2007, Legg Mason Fund Adviser, Inc. replaced Princeton Administrators, LLC ("Princeton") as administrator for the Fund. Under the terms of the Administration Agreement among the Fund, Western Asset and Legg Mason Fund Adviser, Inc. ("LMFA"), Western Asset pays LMFA, a monthly fee at an annual rate of 0.125% of the Fund's average weekly total managed assets, subject to a monthly minimum fee of \$12,500. The compensation arrangements between the Fund and LMFA are identical to the previous arrangements between the Fund and Princeton.

#### 8. Trustee Compensation:

Each Independent Trustee receives an aggregate fee of \$70,000 annually for serving on the combined Board of Trustees/Directors of the Fund, Western Asset Income Fund and Western Asset Funds, Inc. Each Trustee also receives a fee of \$7,500 and related expenses for each meeting of the Board attended in-person and a fee of \$2,500 for participating in each telephonic meeting. The Chairman of the Board and the Chairman of the Audit Committee each receive an additional \$25,000 per year for serving in such capacities. Each member of the Audit Committee receives a fee of \$6,000 for serving as a member of the Audit Committee. Other committee members receive \$3,000 for serving as a member of each committee upon which they serve. Committee members also receive a fee of \$2,500 for participating in each telephonic committee meeting. All such fees are allocated among the Fund, Western Asset Income Fund and Western Asset Funds, Inc. according to each such investment company's average annual net assets. Trustee Ronald Olson receives from Western Asset an aggregate fee of \$70,000 annually for serving on the combined Board of Trustees/Directors of the Fund, Western Asset Income Fund and Western Asset Funds, Inc., as well as a fee of \$7,500 and related expenses for each meeting of the Board attended in person and a fee of \$2,500 for participating in each telephonic meeting.

## 9. Recent Accounting Pronouncements:

In June 2006, the Financial Accounting Standards Board (“FASB”) issued FASB Interpretation 48 (“FIN 48”), *Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement 109*. FIN48 supplements FASB Statement 109, *Accounting for Income Taxes*, and establishes financial reporting rules regarding recognition, measurement, presentation, and disclosure in its financial statements of tax positions that a fund has taken or expects to take on a tax return. FIN 48 became effective for fiscal periods beginning after December 15, 2006. Effective January 1, 2007, the Fund adopted FIN48. There was no material impact to the financial statements or disclosure related thereto as a result of this adoption.

In March 2008, the FASB issued Statement of Financial Accounting Standards No. 161, *Disclosures about Derivative Instruments and Hedging Activities* (“FAS 161”). FAS 161 is effective for fiscal years and interim periods beginning after November 15, 2008. FAS 161 requires enhanced disclosures about a fund’s derivative and hedging activities, including how such activities are accounted for and their effect on a fund’s financial position, performance and cash flows. Management is currently evaluating the impact the adoption of FAS 161 will have on the Fund’s financial statements and related disclosures.

## 10. Shareholder Meeting Results:

The Fund’s annual meeting of shareholders was held on May 6, 2008. Of the 11,471,348 common shares outstanding, the following shares were voted at the meeting:

<u>Election of Trustees:</u>	<u>For</u>	<u>Withheld</u>
Ronald J. Arnault	11,127,136	121,430
Anita L. DeFrantz	11,125,996	122,570
R. Jay Gerken	11,133,374	115,192
Ronald L. Olsen	11,130,580	117,986
Avedick B. Poladian	11,127,449	121,117

Of the 2,880 preferred shares outstanding, the following shares were voted at the meeting:

<u>Election of Trustees:</u>	<u>For</u>	<u>Withheld</u>
Ronald J. Arnault	2,505	114
Anita L. DeFrantz	2,507	112
R. Jay Gerken	2,505	114
Ronald L. Olson	2,505	114
